Public and Situated Displays K. O'Hara, M. Perry, E. Churchill, D. Russell, 2013-03-09 Public and situated display technologies can have an important impact on individual and social behaviour and present us with particular interesting new design considerations and challenges While there is a growing body of research exploring these design considerations and social impact this work remains somewhat disparate making it difficult to assimilate in a coherent manner This book brings together the perspectives of key researchers in the area of public and situated display technology The chapters detail research representing the social technical and interactional aspects of public and situated display technologies The underlying concern common to these chapters is how these displays can be best designed for collaboration coordination community building and mobility Presenting them together allows the reader to examine everyday display activities within the context of emerging technological possibilities

Symbolism, Cognition and Communication in Architecture Abraham George, 2024-06-28 This book discusses the role and significance of symbols and symbolism in graphical communication toward the establishment of meaningful architecture It explores how these are effectively applied in architectural education for the empowerment of learners in various cultures around the world The volume examines the developments in graphic representations while recognizing the importance of cognition and its perception in spatial terms In a scenario where architectural education is at crossroads facing challenges of a global nature this book highlights the importance of understanding architectural curriculum and design subjects The author discusses the issues of communicating the knowledge of architecture to heterogeneous groups of students and explains how design fields and learning in architecture can be modified through cognitive instructional methods The book outlines the methodology to develop symbols and symbolic pedagogical tools for effective communication in architecture The book will appeal to students researchers teachers and scholars of architecture design planning and visual communication It will also be of interest to

architects artists spatial designers town planners urban planners and professionals *Eyes Everywhere* Aaron Doyle, Randy Lippert, David Lyon, 2013-03-01 In many countries camera surveillance has become commonplace and ordinary citizens and consumers are increasingly aware that they are under surveillance in everyday life Camera surveillance is typically perceived as the archetype of contemporary surveillance technologies and processes While there is sometimes fierce debate about their introduction many others take the cameras for granted or even applaud their deployment Yet what the presence of surveillance cameras actually achieves is still very much in question International evidence shows that they have very little effect in deterring crime and in making people feel safer but they do serve to place certain groups under greater official scrutiny and to extend the reach of today's surveillance society *Eyes Everywhere* provides the first international perspective on the development of camera surveillance It scrutinizes the quiet but massive expansion of camera surveillance around the world in recent years focusing especially on Canada the UK and the USA but also including less debated but important contexts such as Brazil China Japan Mexico South Africa and Turkey Containing both broad overviews and illuminating case studies including cameras in taxi cabs and at mega events such as the Olympics the book offers a valuable oversight on the status of camera surveillance in the second decade of the twenty first century The book will be fascinating reading for students and scholars of camera surveillance as well as policy makers and practitioners from the police chambers of commerce private security firms and privacy and data protection agencies
