Making Silent Stones Speak:

Making Silent Stones Speak Kathy D. Schick, Nicholas Patrick Toth, 1994-02-03 In this dramatic reconstruction of the daily lives of the earliest tool making humans two leading anthropologists reveal how the first technologies stone wood and bone tools forever changed the course of human evolution Drawing on two decades of fieldwork around the world authors Kathy Schick and Nicholas Toth take readers on an eye opening journey into humankind s distant past traveling from the savannahs of East Africa to the plains of northern China and the mountains of New Guinea offering a behind the scenes look at the discovery excavation and interpretation of early prehistoric sites Based on the authors unique mix of archaeology and practical experiments ranging from making their own stone tools to theorizing about the origins of human intelligence *Making Silent Stones Speak* brings the latest ideas about human evolution to life *Making Silent Stones Speak* Kathy Diane Schick, 1993

Making Silent Stones Speak Kathy Diane Schick, Nicholas Patrick Toth, 1993 [The Mayan Code](#) Barbara Hand Clow, 2007-03-29 Bestselling author Barbara Hand Clow shows how the Mayan Calendar is a bridge to galactic wisdom that fosters personal growth and human evolution Unearths the meaning behind the calendar its message for modern civilization and what will happen after the calendar ends Reveals how time acceleration is a manifestation of the acceleration of consciousness By the author of *The Pleiadian Agenda* *The Mayan Code* is a deep exploration of how with the end of the Mayan Calendar time and consciousness have been accelerating giving us a new understanding of the universe Using Carl Johan Calleman s research as well as the ideas of other Mayan Calendar scholars Barbara Hand Clow examines 16 4 billion years of evolution to decode the creative patterns of Earth the World Mind These great patterns culminated in 2011 but subsequent astrological influences have continued to inspire us to attain oneness and enlightenment *The Mayan Code* shows how the time cycles of the Calendar match important periods in the evolutionary data banks of Earth and the Milky Way Galaxy These stages of evolution converged during the final stage of the Calendar the period between 1999 and 2011 Evidence of the tightening spiral of time that we experience as time speeding up war and territoriality resource management and separation from nature are all part of daily events we must process during the coming years Barbara Hand Clow counsels that our own personal healing is the most important factor as we prepare to make this critical leap in human evolution now referred to as the awakening of the World Mind

Artifice and Design Barry Allen, 2011-03-15 As familiar and widely appreciated works of modern technology bridges are a good place to study the relationship between the aesthetic and the technical Fully engaged technical design is at once aesthetic and structural In the best work the best design the most well made the look and feel of a device its aesthetic perceptual interface is as important a part of the design problem as its mechanism the interface of parts and systems We have no idea how to make something that is merely efficient a rational instrument blindly indifferent to how it appears No engineer can design such a thing and none has ever been built from *Artifice and Design* In an intriguing book about the aesthetics of technological objects and the relationship between technical

and artistic accomplishment Barry Allen develops the philosophical implications of a series of interrelated concepts knowledge artifact design tool art and technology and uses them to explore parallel questions about artistry in technology and technics in art This may be seen at the heart of *Artifice and Design* in Allen's discussion of seven bridges he focuses at length on two New York bridges the Hell Gate Bridge and the Bayonne Bridge and makes use of original sources for insight into the designers ideas about the aesthetic dimensions of their work Allen starts from the conviction that art and technology must be treated together as two aspects of a common technical human nature The topics covered in *Artifice and Design* are wide ranging and interdisciplinary drawing from evolutionary biology cognitive psychology and the history and anthropology of art and technology The book concludes that it is a mistake to think of art as something subjective or as an arbitrary social representation and of Technology as an instrumental form of purposive rationality By segregating art and technology Allen writes we divide ourselves against ourselves casting up self made obstacles to the ingenuity of art and technology

Adam, Apes and Anthropology Glenn R. Morton, 2017-12-31 Glenn Morton used to be a young earth creationist but the facts changed his views In this his second book Morton shows that mainstream science does not contradict a literal reading of the inerrant word of God The author provides proof that God created Adam and Eve about 5.5 million years B.C Please note that for formatting purposes there is an intentionally blank page between pages 5 and 6 of the main text

Foundation, Fall and Flood Glenn R. Morton, 2017-12-31 Science and the Bible do not contradict one another The author shows that the plain and literal text of the Bible is in perfect harmony with even the latest findings of mainstream science You need not compromise either your faith or your intellect

A Prehistory of the North John F. Hoffecker, 2005 Annotation Early humans did not drift north from Africa as their ability to cope with cooler climates evolved Settlement of Europe and northern Asia occurred in relatively rapid bursts of expansion This study tells the complex story spanning almost two million years of how humans inhabited some of the coldest places on earth

Traditions & Encounters Jerry H. Bentley, 2003 *Stone Knapping* Valentine Roux, Blandine Brill, 2005 How were early stone tools made and what can they tell us about the development of human cognition This question lies at the basis of archaeological research on human origins and evolution and the present volume fulfils a growing need among advanced students and researchers working in this field The individual chapters by a range of leading

international scholars approach stone knapping from a multidisciplinary perspective that embraces psychology physiology behavioural biology and primatology as well as archaeology The skills and behaviour of humans and their primate relatives are key parts of the enquiry The result is a better understanding of early human engagement with the material world and the complex actions required for the creation of stone tools The book contains many illustrations and is extensively referenced and provides a landmark contribution in this field
