Making International Institutions Work Ranjit Lall,2023-02-23 This book explains why some international institutions succeed and others fail and what we can do to improve them

**How Interpretation Makes International Law** Ingo Venzke,2012-09-06 Challenging the classic narrative that sovereign states make the law that constrains them this book argues that treaties and other sources of international law form only the starting point of legal authority Interpretation can shift the meaning of texts and in its own way make law In the practice of interpretation actors debate the meaning of the written and customary laws and so contribute to the making of new law In such cases it is the actor s semantic authority that is key the capacity for their interpretation to be accepted and become established as new reference points for legal discourse The book identifies the practice of interpretation as a significant space for international lawmaking using the key examples of the UN High Commissioner for Refugees and the Appellate Body of the WTO to show how international institutions are able to shape and develop their constituent instruments by adding layers of interpretation and moving the terms of discourse The book applies developments in linguistics to the practice of international legal interpretation building on semantic pragmatism to overcome traditional explanations of lawmaking and to offer a fresh account of how the practice of interpretation makes international law It discusses the normative implications that arise from viewing interpretation in this light and the implications that the importance of semantic changes has for understanding the development of international law The book tests the potential of international law and its doctrine to respond to semantic change and ultimately ponders how semantic authority can be justified democratically in a normative pluriverse
