Making Time Time And Management In Modern Organizations:

Making Time Richard Whipp, Barbara Adam, Ida Sabelis, 2002-07-04 Time is an essential feature of social and organizational life and part of the deep structure of business activity Plans performance productivity and pay are all linked to and often measured by time Yet time is often taken for granted in daily life and the business world The aim of this book is to bring time into sharper focus and in particular to look at the way time is constructed made managed and used in organizations The book both provides an overview of some of the key concepts in time time s arrow time s cycle clock time etc and it explores how particular features of the modern world global time futures etc extend and change the temporal dimension of organizational activity Making Time emphasizes the richness of the temporal relations within organizations and the wealth of competing attempts to order and control time in the act of managing It describes and explains this temporal complexity as it occurs in management giving full recognition to the way that people create their own sense of time alongside the official temporal apparatus of the clock and diary The contributors use a variety of management perspectives strategy organization theory decision making industrial relations and marketing and deliberately place the experience of more traditional industrial settings alongside those at the forefront of the new economy Making Time seeks to spark a debate across the field of management that does justice to the richness of the temporal features of contemporary organizations The book will be vital reading for those who want to understand the complexities of time in organizations and the modern world and the challenges it presents for the theoretical and practical spheres of management

Time in Organizational Research Robert A. Roe, Mary J. Waller, Stewart R. Clegg, 2008-09-09 Pt 1 Managing time people and practices pt 2 Managed by time structures and regimes pt 3 Combining perspectives

Organization and Time Tor Hernes, 2022 Tor Hernes combines foundational ideas from philosophy sociology and organization theory into an integrative theoretical framework of organizational time He explores the four dimensions of experience events resource and practice and how these evolve through mutual interplay and are underpinned by narrative trajectory

A Process Theory of Organization Tor Hernes, 2014 This book presents a novel and comprehensive process theory of organization applicable to a world on the move where connectedness prevails over size flow prevails over stability and temporality prevails over spatiality The process theory developed in the book draws upon process thinking in a number of areas including process philosophy pragmatism phenomenology and science and technology studies Salient ideas from these schools are carefully woven into a process theory of organization which makes the book not only a thought provoking theoretical contribution but also a much needed glimpse into the challenges faced by organizers Taking a distinctly temporal view of organizational life the author shows how actors operate in an on going present in which they draw upon their past and project their past as ambitions for the future This on going work in which technologies concepts and social actors take part is crucial for the making of any type of organizational formation A key construct of the book is that of events which provide force movement and continuity to

organizational life The book is suitable for scholars and advanced level students in organization studies management studies technology studies and sociology It contains a number of practical examples to illustrate the theoretical framework
