Making Work Self Created Jobs In Participatory Organizations:

Making Work W. Ronco, 2013-11-21 This book began as an exploration of collaborative work organizations We knew about people in various occupations who had gotten together to form organizations of equals to manage the settings within which they did their work Among these organizations were a teacher controlled public school a fishermen s cooperative a potters studio a public interest advocacy group and an architectural firm We wondered how these groups functioned and whether and how they contributed to making work satisfying for the individuals in them These groups were of course pretty small potatoes but it seemed to us that they provided a way to an understanding of some much larger current issues Worker satisfaction has surfaced as an issue of current concern and has been represented in research documenting the growing expectations that the members of our society have of their work experience More workers are more educated now than ever before and more and more people seem to look to work as a personal outlet rather than just a source of income We saw our small egalitarian work organizations as providing settings in which people were especially likely to v vi PREFACE find work satisfying We wanted to know both the organizational conditions for satisfying work and the conditions under which collaborative work organizations could keep functioning Since the sociological literature on work satisfaction tends to revolve around issues of autonomy and control we sought out settings in which workers had maximized autonomy and control

Making Work Ronco, 1983 *Healthy Work* Namir Khan, Nina Nakajima, Willem H. Vanderburg, 2004-11-08 The latest in a series focused on improving health conditions this volume addresses work environments bringing together diverse sources of literature that support preventive approaches to work design and organization This reference provides an overview of relevant literature to engineers managers accountants occupational health and safety specialists and industrial hygienists so that they and other professionals can understand what has caused our workplaces to become primary sources of physical and mental illness By focusing on diagnostic and prescriptive approaches managers can implement designs and decisions that prevent or greatly reduce undesired and harmful effects Other titles in the series include *Healthy Cities Sustainable Production Sustainable Energy*

American Studies Jack Salzman, American Studies Association, 1986-08-29 This is an annotated bibliography of 20th century books through 1983 and is a reworking of *American Studies An Annotated Bibliography of Works on the Civilization of the United States* published in 1982 Seeking to provide foreign nationals with a comprehensive and authoritative list of sources of information concerning America it focuses on books that have an important cultural framework and does not include those which are primarily theoretical or methodological It is organized in 11 sections anthropology and folklore art and architecture history literature music political science popular culture psychology religion science technology medicine and sociology Each section contains a preface introducing the reader to basic bibliographic resources in that discipline and paragraph length non evaluative annotations Includes author title and subject indexes ISBN 0 521 32555 2 set 150 00

Breaking the Rules Jon Pynoos, 2012-12-06 This is a study of how a

bureaucracy allocates a commodity or a service in this case public housing In the broadest sense it seeks to understand how bureaucrats try to resolve two often conflicting goals of regulatory justice equity treating like cases alike on the basis of rules and responsiveness making exceptions for persons whose needs require that rules be stretched It analyzes the extent to which such factors as bureaucratic norms the task orientation of workers third party pressure and outside intervention affect staff members use of discretion Many of the rules under consideration were intended by federal officials to achieve such programmatic objectives as racial desegregation and housing for the neediest in this regard the study is also an examination of federal local relationships Finally the study examines how the use of discretion changes over time as an agency's mission shifts and reforms are attempted This book is directed at the audience of administrators of programs who offer services to the public and struggle with how to allocate them The book is also intended for those concerned with housing policy particularly the difficult problems of whom to house Finally it is hoped that students of public management social welfare government and urban planning who are interested in how public policy is administered through a bureaucracy will find the book insightful The case chosen for study is the Boston Housing Authority

Cities of the Mind Lloyd Rodwin, Robert M. Hollister, 2013-06-29 Curious about the images of the city that have been evolving in the different social sciences we did what academics often do in such a situation we set up a seminar on Images of the City in the Social Sciences From the start we counted on the help of specialists in other fields to pursue their interests Of the persons who agreed to participate all but two came from the United States and their analyses in the main reflect the experience of Western countries and the United States In our formal instructions to our collaborators we took for granted that a variety of images of the city could be found or inferred in their fields of expertise We asked them to identify these images and their functions to explain how and why they have changed over time and to relate these images to the distinct intellectual traditions and techniques analytical or otherwise in their respective fields The definition of image was left to the judgment of the participants

Neighborhoods, People, and Community Roger Ahlbrandt, 2013-03-09 This book focuses on neighborhoods and the people living in them It describes differences among neighborhoods in terms of their social and institutional structure attitudes of the residents quality of life and the characteristics of the residents The book is based on the results of a survey of almost 6 000 residents living throughout the city of Pittsburgh As such it provides the basis for examining groups of people as well as whole neighborhoods The communal aspects of urban living are discussed in Chapters 1 and 2 attachment toward the neighborhood in Chapter 3 importance of religion life cycle and race in Chapter 4 various aspects of individual social support systems and neighborhood social fabric in Chapters 5 6 and 7 the contextual aspects of the neighborhood environment in Chapters 8 and 9 and the implications for urban policy in Chapter 10 The results of the analysis described in the book provide a detailed understanding of differences in the structure and composition of urban neighborhoods and they show why some groups of people are drawn into their neighborhoods whereas others rely more upon the wider community to meet a variety of needs

The analysis provides the framework in which to address the implications for urban policy particularly with respect to mental health prevention and neighborhood and community renewal

The Art of Planning Leland S. Burns, John Friedmann, 2012-12-06 The work of Harvey S Perloff stands as a landmark in the evolution of Anglo American planning doctrine It is impossible to fully capture the essence of the published work in a paragraph page or even an entire essay Yet its highpoints can be identified His work was innovative reformist comprehensive and oriented toward the future In emphasizing the greater importance of people compared to things Perloff repeatedly prodded planners to be concerned with human needs and values He was critical of the past But inasmuch as he devoted more effort to envisioning what could lie ahead than in recalling the past his work was markedly optimistic He once admitted in writing to his built in weakness for expecting rational socially oriented solutions ultimately to win out no matter what the objective situation seems to be To some the expectation may be seen as naive to others as a faith in the wisdom of humankind to take the best course However received Perloff's optimism served as a powerful stimulant to keep moving ahead for the best that would come of it Institutions and the ways they should be shaped and reshaped were of central concern for institutions though he rarely used the term were the instruments through which knowledge was translated into action

The Future of Housing Markets Leland S. Burns, Leo Grebler, 2012-12-06 This book's title betrays at once that it belongs in the forecast literature Peering into the future is a notoriously treacherous venture Nevertheless it has become a practice endemic to the business and government worlds as well as to academia especially economics We like to believe that the enormous growth of forecasting in the face of some disappointments reflects real needs of decision makers as well as the general public's well warranted curiosity about the future Fashion alone could hardly explain the sustained increase in the market for forecast services during the past few decades Some professionals insist on fine distinctions between the forecast the projection the prediction and the prophecy The differences are more semantic than real as the mandatory resort to Webster confirms The entry forecast includes references to prediction and prophecy without differentiation while projection is defined among other things as prediction or advance estimate We use mainly the term projections because

v PREFACE vi much of our statistical research is based on forward estimates of population and households by the U S Bureau of the Census which the bureau itself the greatest fountain of data in the world records as projections
