## **Man And The Future:**

The Doctrine of Man's Future Eternity John Jackson, C. Matthew McMahon, 2020-10-14 In this work Jackson lays down biblically the doctrine of eternity and the importance of man's never dying soul that hangs in its balance This being a fundamental point of Christian divinity it should be plainly proved clearly explained and powerfully applied to us He explains what eternity is in the final four basic tenants of Christian doctrine death judgment heaven and hell He then proves by Scripture the many infallible proofs that all mankind at the end of this world shall go in their bodies and souls into an everlasting condition either of happiness or misery Then he describes the misery of that everlasting condition of woe and punishment that the wicked shall go into at the end of the world Afterward he explains the happiness of the eternal state of glory and rest that the righteous shall go into at the last day a most excellent and comforting exhortation Following this he takes a chapter to explain the principal reasons why all mankind after the day of judgment shall go in their bodies and souls into an everlasting condition either of happiness or misery Not only that it will happen but the all important why it will happen In the last chapter he directs the reader how to apply the great doctrine of man's future eternity in order to escape everlasting punishment and obtain eternal life only in Jesus Christ after this life is ended This is a blessed treatise deep in its power and application a God glorifying and Christ exalting work by this eminent divine This work is not a scan or facsimile has been carefully transcribed by hand being made easy to read in modern English and has an active table of contents for electronic versions

**Man's Future Birthright** Hermann Joseph Muller, 1973-01-01 Hermann Joseph Muller 1890 1967 was a member of the early genetics group at Columbia University that developed the chromosome theory of inheritance T H Morgan received the Nobel Prize in Medicine and Physiology for this work in 1934 and Muller his student received the Nobel Prize in 1946 for his discovery of radiation induced mutation Muller's writings extended beyond contributions to technical journals He was an active critic of social abuse of science he advocated eugenic programs based on free choice and he played a major role in the reform of high school biology Muller's social views were published in magazines and journals which are accessible to scholars more than to the lay reader or student They have been collected here to show how extensively he thought our lives are affected by radiation evolution modern medicine and gene theory He attempted to alert humanity to the dangers of neglect and abuse of their genetic heritage He also used humanistic values to urge mankind to improve itself to foster cooperativeness to increase health and intelligence and to adopt an evolutionary outlook A companion collection of essays The Modern Concept of Nature Essays on Theoretical Biology by H J Muller also published by State University of New York Press deals with Muller's scientific contributions to genetics and evolution It was Muller who developed the relation between genes and mutation his views on the primacy of the gene in biology are reflected today in the similar primacy of nucleic acids as the basis of life For students of the history of ideas a collection of these essays would illustrate how genetic thinking prepared the world view for molecular biologists The relation of science to values is often neglected because of the

inaccessibility of the written contributions of famous scientists To read Muller s major essays in these two areas is an important way to evaluate a scientist s career his maturation of ideas and his developing application of science to society

*The History of Man's Future* Daniel Ontengco Jr.,2008-03-27 There was once a man who wanted to be more than he was Even though the man had a heartbroken soul he hoped that one day he would again have a chance to prove himself In time the man got his chance when alien invaders attacked his homeland Earth In response he went on an epic journey through space and his own mind and eventually discovered the secret to the origins of mankind With his newfound knowledge and powers the man learned that the meaning of life is to be as selfless as possible In his quest to save the world he was forced to overcome great hardships Eventually this man of the future became a true hero Adversity did not build his character it revealed it This is his story
