Q. How to insert columns in document?

Columns are used in many types of documents, but they are most commonly used in newspapers, magazines, academic journals, and newsletters.

1. Select the text you want to format.
2. Click the **Page Layout** tab.
3. Click the **Columns** command. A drop-down menu will appear.

4. Select the number of columns you want to insert. The text will then format into columns.

Note that if you want to remove the columns click the **Columns** command and select **One** for the number of columns.

Q. How to add column break in document?

Once you've created columns, the text will automatically flow from one column to the next. Sometimes, though, you might want to control exactly where each column begins. You can do this by creating **column breaks**.

1. Place the **insertion point** where you want to add the break.
2. Click the **Page Layout** tab.
