Mid Life Careers:

Mid-life Careers Jean Lisette Brodey,1983 Abstract A guide helps those over 35 to understand and cope with the working world and develop or change careers The positive and negative aspects being middle aged are examined as the author surveys the employment scene changes in the marketplace the differences between a job and a career motivation the rewards of work and special problems of working women Anyone who wants to take a personal inventory and find a position in the working world can by learning how to map out a career strategy adapt existing skills to new careers prepare for an interview write a resume and cover letters develop contacts and information about the world of work and obtain on the job apprenticeships kbc

Americans at Midlife Rosalie G. Genovese,1997-05-30 Americans at Midlife is an exploration of the middle years within the framework of trends in the larger society including longer life expectancy and an aging population changes in marriage divorce and family composition increased participation of women in the labor force and the growth of two income families Major interests at midlife center around work and careers current and future economic well being and planning for retirement Other major concerns involve relationships with younger and older generations boomerang kids who leave home and return and aging parents often healthy and active now who may need care in their later years The book begins with a discussion of how demographic and social changes affect midlife followed by chapters on work and retirement planning or looking for the good years the not so empty nest and aging parents A chapter on mid life women considers the implications of combining work and caregiving and raises concerns about their economic well being given their longer life expectancy and often more limited resources The book ends with a consideration of policy issues that may affect midlife in the future

Midlife Maze Janis Clark Johnston,2017-02-16 Have you found yourself wilting in midlife and wondering what you might do to flourish in your remaining years Have you lost your way in the midlife maze due to a significant loss Did you lose your job or desired career advancement Did you separate or divorce Did your last child leave home Did your family experience a virtual storm of bankruptcy or lose your life savings in a financial meltdown Did you or someone in your family experience the loss of good health Or did you weather the death of a family member partner or friend Your loss story is personal Your path through winding passages during midlife is unique Perhaps the most important encouragement for your grieving process is to know this simple fact grieving is a natural healing response to loss rather than a pathological experience Midlife can be a time of reflection rebellion or reconnecting to old or new interests and activities It can also be a time when losses start to happen or begin to pile up divorce death of a loved one loss of a job or home the moving out and on of grown children and learning how to move forward can be a challenge Here a seasoned psychologist looks at the geography of loss in midlife the way it can affect us and what we can do to get back on track or redirect ourselves when necessary Through first hand stories and practical exercises the author leads readers through the midlife maze to a place of recovery purpose and peace

Richard P. Olson,1980 **California. Court of Appeal (3rd Appellate District). Records and Briefs** California (State)., **Mid-life, Developmental and Clinical Issues** William H. Norman,Thomas J. Scaramella,1980 The contributors to this volume demonstrate that middle aged adulthood encompasses more than specific years biological changes or orchestrations of earlier adaptations Rather professionals are now viewing the middle years as a period in the life cycle like other periods in which a person s past endowments and deficits as well as present opportunities and restraints all interact with consequences that influence changes in self perception and the boundary between self and the interpersonal world With these ideas in mind the book is intended to serve two major purposes The first purpose is to provide the reader with a survey of the accumulating literature on the social and personal factors that influence not only the alterations in the rhythm and timing of life events thus affecting perceptions of self and adaptational patterns but also the developing personality and future life prospects The second purpose of this book is to alert the reader to those developmental challenges options and potential problematic areas that have important implications in the clinical setting Each of the nine chapters that follow examines a particular area within the field of middle adulthood development Each chapter can be read as an up to date and authoritative contribution in the area it covers **Changing Lives** Martin Bloom,1992 Helping professionals must know the underlying structures and dynamics of human behavior and development if they are to offer efficacious and humane care From across the broad spectrum of the social and health sciences this anthology presents important recent writings about human experience Changing Lives combines the presentation of basic information on human development with balanced descriptions of preventive and interventive methods of helping The volume comprises forty eight papers from a wide range of educators and health professionals from psychology sociology and epidemiology to social work nursing and counseling reflecting the multidisciplinary context in which the teaching of human development occurs Bloom has included papers which provide illustrations of all the modes of helping primary prevention treatment and rehabilitation those which address the major theoretical orientations of our day the ecological perspective the behavioral approach and psychodynamic theories an I witness report by a homeless woman and clinical case studies and research reports Each paper is self contained and includes references for additional study The readings are grouped around the eight elemental or universal human experiences growth and development communication love sexuality and pregnancy and life and death Each developmental phase from infancy to

old age receives focused attention as indicated by alternative tables of contents Readers are introduced to the wide and penetrating scope of contemporary knowledge and critical questions are raised about what helping professionals know and how this knowledge might best be applied in practice from back cover
