Middle East In Transition:

The Middle East in Transition Walter Laqueur, 1971 [The Middle East in Transition](#) The Choices Program - Brown University Staff, Thomas J. Watson, Jr. Institute for International Studies (Brown University), Choices for the 21st Century Education Program, 2011-12-31 Draws students into the policy debate on one of the world's most volatile regions. Students explore the Arab-Israeli conflict, the significance of oil, the Arab Spring, and other issues that shape U.S. ties to the Middle East. Cover p. 4 *Rethinking* Kenneth H. Williams, Marine Corps University (U.S.). Press, 2011. Includes 21 different contributors making up panels during this conference to present their essays on the United States' dealings with the Middle East conflicts, leadership dynamics, challenges, and approaches to U.S. foreign policy in this region. *The Middle East in Transition* Nils A. Butenschøn, Roel Meijer, 2018. The Middle East is currently undergoing its most dramatic transition since World War I. The political order, both within individual countries and on the regional level, has been in turmoil ever since the Arab Uprisings in 2011. Analysts are struggling to identify conceptual frameworks that capture the complex nature of the developments that we observe. *The Middle East in Transition* demonstrates how citizenship, understood as a social contract between citizens and the state, is a key factor in current political crises in the region. The book analyses three distinct dimensions of citizenship in the Middle East: the development of citizenship in specific countries including Morocco, Israel, Turkey, and Iraq; Islam and the writings of twentieth-century Islamic thinkers; and the international dimension of citizenship, particularly regarding EU policies towards the region and the rights of Syrian refugees. This timely book provides a comprehensive insight into the current implications of the changing relationships between the citizen and the state in the Middle East. Discussing the topic with clarity and detail, it will be essential reading not only for researchers but also for policy makers and government officials.

The Middle East in Transition The Choices Program - Brown University Staff, 2017-12-15. The term Middle East can create a mental image of a group of similar countries and peoples with shared politics and histories, but this is deceptive. The people of this part of the world have diverse ethnicities, religions, languages, and understandings of their histories. They experience a variety of different ways of life. This diverse and complex region plays an important role in U.S. foreign policy. *The Middle East: Questions for U.S. Policy* equips students to consider the role of U.S. policy in the Middle East. Part I of the reading introduces the political history of the Middle East prior to U.S. involvement, as well as the history of U.S. policy in the region through World War II. Parts II and III examine major events in the Middle East that shaped the region's relationship with the United States through the present. Part IV includes six case studies that examine the factors that have influenced U.S. policy. **Middle East Transitions** Shahid Yusuf, 2014-07-25. Since the onset of the Arab Spring, economic uncertainty in Egypt, Jordan, Libya, Morocco, Tunisia, and Yemen, Arab Countries in Transition (ACTs) has slowed already sluggish growth, worsened unemployment, particularly of youth, undermined business confidence, affected tourist arrivals, and depressed domestic and foreign direct investment. Furthermore, political and social tensions have constrained reform efforts. Assessing

policy options as presented in the voluminous literature on the Arab Spring and based on cross country experience this paper concludes that sustainable and inclusive growth calls for a two pronged approach short term measures that revive growth momentum and partially allay popular concerns complemented with efforts to adjust the public s expectations and prepare the ground for structural reforms that will deliver the desired longer tem performance

Comparative Political Transitions between Southeast Asia and the Middle East and North Africa Teresita Cruz-del Rosario, James M. Dorsey, 2016-07-18 This book investigates the theme of global transitions with a cross regional comparative study of two areas experiencing change over the past three decades Southeast Asia and the Middle East and North Africa MENA Political transitions in Asia have been the subject of interest in academic and policy making communities recently as there are encouraging signs of democratization in countries that exhibit elements of authoritarianism In those countries with relatively open political systems transitions to democracy have been complete albeit messy flawed and highly contested In contrast countries of the MENA region that have been gripped by revolts in recent years find themselves in the midst of chaotic and uncontrollable transitions Why are there such differences between these regions What if anything can be learned and applied from the transitions in Southeast Asia These questions are answered here as Asia s experience is contrasted with the Arab revolts and the struggle of the different countries in the MENA region to fashion a new social contract between states and citizens
