Hanks, 2015-10-27 The 1920s and 1930s saw the birth of modernism in the United States a new aesthetic based on the principles of the Bauhaus in Germany its merging of architecture with fine and applied arts and rational functional design devoid of ornament and without reference to historical styles Alfred H Barr Jr the then 27 year old founding director of the Museum of Modern Art and 23 year old Philip Johnson director of its architecture department were the visionary young proponents of the modern approach Shortly after meeting at Wellesley College where Barr taught art history and as Johnson finished his studies in philosophy at Harvard they set out on a path that would transform the museum world and change the course of design in America The Museum of Modern Art opened just over a

week after the stock market crash of 1929 In the depths of the Depression using as their laboratories both MoMA and their own apartments in New York City Barr and Johnson experimented with new ideas in museum ideology extending the scope beyond painting and sculpture to include architecture photography graphic design furniture industrial design and film with exhibitions of ordinary machine made objects including ball bearings and kitchenware elevated to art by their elegant design and with installations in dramatically lit galleries with smooth white walls Partners in Design which accompanies an exhibition opening at the Montreal Museum of Fine Arts in April 2016 chronicles their collaboration placing it in the larger context of the avant garde in New York 1930s salons where they mingled with Julien Levy the gallerist who brought Surrealism to the United States and Lincoln Kirstein co founder of the New York City Ballet their work to help Bauhaus artists like Josef and Anni Albers escape Nazi Germany and the dissemination of their ideas across the United States through MoMA s traveling exhibition program Plentifully illustrated with icons of modernist design MoMA installation views and previously unpublished images of the Barr and Johnson apartments domestic laboratories for modernism and in Johnson s case designed and furnished by Ludwig Mies van der Rohe this fascinating study sheds new light on the introduction and success in North America of a new kind of modernism thanks to the combined efforts of two uniquely discerning and influential individuals *Mies Van Der Rohe at Work* Peter Carter,1974 This comprehensive study of the work of one of modern architecture s founding fathers and creator of the Barcelona Pavilion and the Seagram Building breaks new ground in its field in that its author English architect Peter Carter writes from over a decade s personal experience first as a student and subsequently as a close associate and friend of the late Ludwig Mies van der Rohe from book jacket **Encyclopedia of Interior Design** Joanna Banham,1997-05 First published in 1997 Routledge is an imprint of Taylor Francis an informa company
