Migrants And Migrations:

Migration Michael H. Fisher, 2013-11-04 Migration began with our origin as the human species and continues today. Each chapter of world history features distinct types of migration. The earliest migrations spread humans across the globe. Over the centuries, as our cultures, societies, and technologies evolved in different material environments, migrants conflicted, merged, and cohabited with each other, creating, entering, and leaving various city states, kingdoms, empires, and nations. During the early modern period, migrations reconnected the continents, including through colonization and forced migrations of subject peoples, while political concepts like citizen and alien developed. In recent history, migrations changed their character as nation states and transnational unions sought in new ways to control the peoples who migrated across their borders. This volume will explore the process of migration chronologically and also at several levels, from the illuminating example of the migration of an individual community to larger patterns of the collective movements of major ethnic groups to the more abstract study of the processes of emigration, migration, and immigration. This book will concentrate on substantial migrations covering long distances and involving large numbers of people. It will intentionally balance evidence from the now diverse peoples of the world, for example, by highlighting an exemplary migration for each of the six chapters that highlights different trajectories and by keeping issues of gender and socio-economic class salient wherever appropriate. Further, as a major theme, the volume will consider how technology, the environment, and various polities have historically shaped human migration. Exciting new scholarship in the several fields inherent in this topic makes it a particularly valuable and timely project.

Global History And Migrations Gungwu Wang, 2018-02-12 Humans have been on the move for millennia. They have done so slowly, as well as quickly, sometimes involuntarily, sometimes transported by force, often relocated at great cost in lives, but they have always moved. Over the centuries, improved transportation has eased the movement, even in the face of man-made or natural obstacles. But in modern times, migration has accelerated, and its reach has become truly global. Whether it is Turkish *gastarbeiter* in Germany, Japanese *Nisei* in Seattle, Filipinos in Kuwait, or Haitians in Brooklyn, the costs and benefits of human mobility on such a wide and rapid scale are hotly debated. *Global History and Migrations*, the second volume of the *Global History Series*, explores the historical background of this issue by focusing on recent history, a time when human movements have been at their most dynamic. This book provides a rich cross-cultural foundation for a more enlightened understanding of migration and its role in the unfolding shape of global history.

Migrants and Migration in Modern North America Dirk Hoerder, Nora Faires, 2011-09-26 Presenting an unprecedented integrated view of migration in North America, this interdisciplinary collection of essays illuminates the movements of people within and between Canada, the Caribbean, Mexico, and the United States over the past two centuries. Several essays discuss recent migrations from Central America, as well. In the introduction, Dirk Hoerder provides a sweeping historical overview of North American societies in the Atlantic world. He

also develops and advocates what he and Nora Faires call transcultural societal studies an interdisciplinary approach to migration studies that combines migration research across disciplines and at the local regional national and transnational levels The contributors examine the movements of diverse populations across North America in relation to changing cultural political and economic patterns They describe the ways that people have fashioned cross border lives as well as the effects of shifting labor markets in facilitating or hindering cross border movement the place of formal and informal politics in migration processes and migrants lives and the creation and transformation of borderlands economies societies and cultures This collection offers rich new perspectives on migration in North America and on the broader study of migration history Contributors Jaime R Aguila Rodolfo Casillas R Nora Faires Maria Cristina Garcia Delia Gonz les de Reufels Brian Gratton Susan E Gray James N Gregory John Mason Hart Dirk Hoerder Dan Killoren Sarah Jane Saje Mathieu Catherine O Donnell Kerry Preibisch Lara Putnam Bruno Ramirez Angelika Sauer Melanie Shell Weiss Yukari Takai Omar S Valerio Jim nez Carlos G V lez Ib ez *Migrations And Cultures* Thomas Sowell,2025-04-01 Most commentators look at the issue of immigration from the viewpoint of immediate politics In doing so they focus on only a piece of the issue and lose touch with the larger picture Now Thomas Sowell offers a sweeping historical and global look at a large number of migrations over a long period of time Migrations and Cultures shows the persistence of cultural traits in particular racial and ethnic groups and the role these groups relocations play in redistributing skills knowledge and other forms of human capital answers the question What are the effects of disseminating the patterns of the particular set of skills attitudes and lifestyles each ethnic group has carried forth both for the immigrants and for the host countries in social as well as economic terms [Migrations: Interdisciplinary Perspectives](#) Michi Messer,Renee Schroeder,Ruth Wodak,2012-05-26 This volume covers the most important contributions to and discussions at the international symposium Migrations Interdisciplinary Perspectives 1 3 July University of Vienna organised by Ren e Schroeder and Ruth Wodak which was dedicated to the multiple interdisciplinary dimensions of migrations both from the viewpoints of the Social Sciences and Humanities as well as from the manifold perspectives of the Natural Sciences The book is organized along the following dimensions Urban Development and Migration Peer Relations in Immigrant Adolescents Methodological Challenges and Key Findings Migration Identity and Belonging Migration in and Ego Documents Debating Migration Fundamentals of Diffusion and Spread in the Natural Sciences and beyond Media Representations of Migrants and Migration Migration and the Genes **What is Migration History?** Christiane Harzig,Dirk Hoerder,2009-07-07 The study of migration is and always has been an interdisciplinary field of study vast and vibrant in nature This short introduction to the field written by leading historians of migration for student readers offers an acute analysis of key issues across several disciplines It takes in its scope an overview of migrations through history how classic theories have interpreted such movements and contemporary topics and debates including transnational and transcultural lives access to citizenship and migrant entrepreneurship Historical perspectives reveal how the scholarly field

International Migration Douglas S. Massey, J. Edward Taylor, 2004-03-25 International Migration Prospects and Policies offers a comprehensive up to date survey of global patterns of international migration and the policies employed to manage the flows It shows that international migration is not rooted in poverty or rapid population growth but in the expansion and consolidation of global markets As nations are structurally transformed by their incorporation into global markets people are displaced from traditional livelihoods and become international migrants In seeking to work abroad they do not necessarily move to the closest or richest destination but to places already connected to their countries of origin socially economically and politically When they move migrants rely heavily on social networks created by earlier waves of immigrants and in recent years professional migration brokers have become increasingly common Developing countries generally benefit from international migration because migrant savings and remittances provide foreign earnings to finance balance of payments deficits and make productive investments Some developing nations have gone so far as to establish programs or ministries dedicated to the export of workers Developed nations in contrast focus more on the social and economic costs of immigrants and seek to reduce their numbers regulate their characteristics and limit their access to social services Over time receiving nations have gravitated toward a similar set of restrictive policies yielding undocumented migration as a worldwide phenomenon Globalization also creates infrastructures of transportation communication and social networks to put developed societies within reach In the latter ageing populations and segmenting markets create a persistent demand for immigrant workers All these trends are likely to intensify in the coming years to make immigration policy a key political issue in the twenty first century

The Evolution of Migration Management in the Global North Christina Oelgemoller, 2017-03-16 The Evolution of Migration Management in the Global North explores how the radically violent migration management paradigm that dominates today s international migration has been assembled Drawing on unique archive material it shows how a forum of diplomats and civil servants constructed the transit country as a site in which the illegal migrant became the main actor to be vilified Policy makers are divided between those who oppose migration and those who support it so long as it is properly managed Any other position is generally seen at best as utopian This volume advances a new way of conceptualizing policy making in international migration at the regional and international level Introducing the concept of informal plurilateralism Oelgemoller explores how the Inter Governmental Consultations on Asylum Migration and Refugees IGC created the hegemonic paradigm of Migration Management thus enabling today s specific ways the migrant has their juridico political status violently denied This raises crucial questions

about what democracy is and about the way in which the value of a human being is established granted or denied Inviting debate in a field which is often under theorized this work will be of great interest to students and scholars of International Relations Migration Studies and International Relations Theory Climate Change, Migration and Human Rights Dimitra Manou,Andrew Baldwin,Dug Cubie,Anja Mihr,Teresa Thorp,2017-05-12 Climate Change already having serious impacts on the lives of millions of people across the world These impacts are not only ecological but also social economic and legal Among the most significant of such impacts is climate change induced migration The implications of this on human rights raise pressing questions which require serious scholarly reflection Drawing together experts in this field Climate Change Migration and Human Rights offers a fresh perspective on human rights law and policy issues in the climate change regime by examining the interrelationships between various aspects of human rights climate change and migration Three key themes are explored understanding the concepts of human dignity human rights and human security the theoretical nexus between human rights climate change and migration or displacement and the practical implications and challenges for lawyers and policy makers of protecting human dignity in the face of climate change and displacement The book also includes a series of case studies from Alaska Bangladesh Kenya and the Pacific islands which aim to improve our understanding of the theoretical and practical implications of climate change for human rights and migration This book will be of great interest to scholars of environmental law and policy human rights law climate change and migration and refugee studies
