A Guide to Faculty Development
Kay J. Gillespie, Douglas L. Robertson, 2010-02-18 Since the first edition of A Guide to Faculty Development was published in 2002 the dynamic field of educational and faculty development has undergone many changes Prepared under the auspices of the Professional and Organizational Development Network in Higher Education POD this thoroughly revised updated and expanded edition offers a fundamental resource for faculty developers as well as for faculty and administrators interested in promoting and sustaining faculty development within their institutions This essential book offers an introduction to the topic includes twenty three chapters by leading experts in the field and provides the most relevant information on a range of faculty development topics including establishing and sustaining a faculty development program the key issues of assessment diversity and technology and faculty development across institutional types career stages and organizations This volume contains the gallant story of the emergence of a movement to sustain the vitality of college and university faculty in difficult times This practical guide draws on the best minds shaping the field the most productive experience and elicits the imagination required to envision a dynamic future for learning societies in a global context R Eugene Rice senior scholar Association of American Colleges and Universities Across the country people in higher education are thinking about how to prepare our graduates for a rapidly changing world while supporting our faculty colleagues who grew up in a very different world Faculty members academic administrators and policymakers alike will learn a great deal from this volume about how to put together a successful faculty development program and create a supportive environment for learning in challenging times Judith A Ramaley president Winona State University This is the book on faculty development in higher education Everyone involved in faculty development including provosts deans department chairs faculty and teaching center staff will learn from the extensive research and the practical wisdom in the Guide Peter Felten president The POD Network 2010 2011 and director Center for the Advancement of Teaching and Learning Elon University *Higher Education in the United States* James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers

of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis Higher Education: Handbook of Theory and Research J.C. Smart,2006-01-18 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community Each annual volume contains manuscripts on such diverse topics as research on college students and faculty governance and planning advances in research methodology economics and finance and curriculum and instruction The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world It encompasses Comprehensive reviews of contemporary and emerging issues in postsecondary education Hundreds of citations in a wide range of scholarly journals including all leading journals of higher education and many other social science and professional journals An indispensable resource for administrators researchers and policymakers Published annually since 1985 Extraordinary Learning in the Workplace Janet P. Hafler,2011-01-04 The contributing authors of this multidisciplinary text agree that workplace learning truly is extraordinary when it is marked by structural congruence and a positive synergy among the intended and formal preparation of professionals that tacit learning occurs within the hidden curriculum and that the subsequent demands both formal and tacit are embedded in subsequent workplace settings Thus for this text these authors explore research and practice literature related to curriculum instruction and assessment of professionals learning in the workplace and the implications for best practices But what makes this book truly unique is that the authors examine that literature in the context of four professions education nursing medicine and clergy at the point of those professions wherein students are learning during the degree program stages of their education Extraordinary Learning in the Workplace is broken into four main sections Part I explores curriculum both formal and hidden Part II focuses on conceptions and theories of learning and instruction and is intended to inform the work of educators with regard to components of professional education that occur in the practice settings of the workplace Part III covers assessment using medicine as its example to argue that assessment has remained largely unchanged for years thus making the multiple choice questions tests introduced in the 1950s the de facto gold standard for quality assessment And Part IV focuses on the training of the instructors visiting the three key themes of relationships activities or tasks and work practices A Guide to Faculty Development Kay Herr Gillespie,2002 Some material in this book is based on A Handbook for new practitioners published by New Forums Press in 1988 T p verso Evaluating Online Teaching Thomas J. Tobin,B. Jean

Mandernach, Ann H. Taylor, 2015-05-13 Create a more effective system for evaluating online faculty Evaluating Online Teaching is the first comprehensive book to outline strategies for effectively measuring the quality of online teaching providing the tools and guidance that faculty members and administrators need The authors address challenges that colleges and universities face in creating effective online teacher evaluations including organizational structure institutional governance faculty and administrator attitudes and possible budget constraints Through the integration of case studies and theory the text provides practical solutions geared to address challenges and foster effective efficient evaluations of online teaching Readers gain access to rubrics forms and worksheets that they can customize to fit the needs of their unique institutions Evaluation methods designed for face to face classrooms from student surveys to administrative observations are often applied to the online teaching environment leaving reviewers and instructors with an ill fitted and incomplete analysis Evaluating Online Teaching shows how strategies for evaluating online teaching differ from those used in traditional classrooms and vary as a function of the nature purpose and focus of the evaluation This book guides faculty members and administrators in crafting an evaluation process specifically suited to online teaching and learning for more accurate feedback and better results Readers will Learn how to evaluate online teaching performance Examine best practices for student ratings of online teaching Discover methods and tools for gathering informal feedback Understand the online teaching evaluation life cycle The book concludes with an examination of strategies for fostering change across campus as well as structures for creating a climate of assessment that includes online teaching as a component Evaluating Online Teaching helps institutions rethink the evaluation process for online teaching with the end goal of improving teaching and learning student success and institutional results Creating the Future of Faculty Development Mary Deane Sorcinelli, 2006 Efforts to support and enrich faculty work particularly in a changing context are critically important to faculty members institutional leaders and higher education itself This book surveys faculty development from its beginnings summarizes the challenges and pressures now facing developers and higher education as a whole and proposes an agenda for the future of faculty development Based on a study of nearly 500 faculty developers from all institutional types this book offers a vision of what the field might become addressing several key issues such as the structural variations among faculty development programs the goals purposes and models that guide and influence program development and the top challenges facing faculty members institutions and faculty development programs Contents include The Evolution of Faculty Development A Portrait of Current Faculty Development Personnel and Programs Influences on Developers and Programs Current Issues Addressed by Faculty Development Services Future Priorities for Faculty Development Future Directions for Faculty Development Open Ended Responses Faculty Development in the Age of the Network **To Improve the Academy** Linda B.
