Research Methods in the Social and Health Sciences Research Decisions by Ted Palys and Chris Atchison gives students a thorough thoughtful and highly readable introduction to the entire research process from start to finish From its underlying premise that your research questions and objectives rather than any specific method should guide your research this book discusses each step of the research process from limiting the scope of a literature review to navigating ethical considerations to deciding which methods are best suited for finding answers to specific research questions to how to analyze data and present findings Readers are encouraged to think deeply about each step of the research process The book promotes this deliberation by discussing the strengths and limitations of different methods and Throughout the process the authors provide many examples from their own and student research sharing insights for research decisions arising from that experience Readers will develop the skills to create solid research questions perform literature reviews identify appropriate data sources and methods conduct research analyze and interpret data and translate the resulting knowledge generated from the research process to a wider audience all core parts of the research process by developing their knowledge and creating confidence in their own decision making skills After explaining the unique and often complementary strengths of qualitative and quantitative methods students focus on what methods are best suited for finding answers to the research questions that interest them Major types of research including experiments case studies surveys quasi experiments ethnographies focus groups participatory action research and archival studies all receive significant coverage The text illustrates how these methods are enhanced by integrating them with 21st century technologies and combining them in mixed methods projects Chapters on constructing a research proposal and disseminating research bookend the process with concrete steps in between to support students designing their own original research projects Study questions at the end of each chapter encourage students to think critically about the research process and how the choices a researcher makes will broaden or constrain what they can find By the end of the text social and health science students will feel confident in undertaking ethical and thoughtful research *Language Assessment and Programme Evaluation* Brian K. Lynch, 2019-08-05 This volume examines the overlapping areas of evaluation and assessment where evaluation is defined as the systematic use of information to make decisions about language teaching programmes and assessment as the systematic use of information to make decisions about individuals and their language ability A variety of topics are covered including paradigms and purposes

design techniques quantitative and qualitative methods for collecting and analysing data and ethical social and political considerations in the conduct of evaluation and assessment The book has two important goals to underscore the relationships between the enterprises of evaluation and assessment and to encourage the use of new paradigms in our approaches to these enterprises Features The first treatment of assessment and evaluation in one volume Exercises and suggestions for further reading at the end of each chapter Includes an extensive bibliography Document Retrieval Index,1974 Selected Literature on Evaluation National Institute of Law Enforcement and Criminal Justice,1975 Basic Elements of Survey Research in Education Ulemu Luhanga,Allen G.
