## **Questioning Geopolitics Political Projects In A Changing World System:**

*Questioning Geopolitics* Georgi M. Derluguian, Scott L. Greer, 2000-08-30 This volume takes an enlightened step back from the ongoing discussion of globalization. The authors reject the notion that globalization is an analytically useful term. Rather, this volume shows globalization as merely the framework of the current political debate on the future of world power. Some of the many other novel ideas advanced by the authors include the explicit prediction that East Asia is not going to become the center of the world, the contention that the USSR collapsed for the same reasons that nearly brought down the United States in 1973, and the notion that the regional economic networks that are emerging from under the modern states are in fact rather old formations. The articles in the volume are organized around three main themes. Part One explores both the changing patterns of global power from the viewpoint of geopolitics and the Gramscian approach to the study of international relations. Part Two further develops the debate among a number of eminent historians and sociologists, challenging both the apologists for and the opponents of globalization in new and unexpected ways. Part Three traces the emergence of regional economic networks and explores the ambiguous problems of security and identity posed by the old/new transborder formations.

[Mentoring, Methods, and Movements: Colloquium in Honor of Terence K. Hopkins by His Former Students and the Fernand Braudel Center for the Study of Economies, Historical Systems, and Civilizations](#)

Immanuel M. Wallerstein, Mohammad H. Tamdgidi, 2017-01-01 Terence Kilbourne Hopkins 1929-1997 was a hidden gem of the field of world systems studies who contributed indispensably to its foundation amid a lifelong collaboration and friendship with Immanuel Wallerstein. His pedagogical humanism, methodological rigor, and scientific commitment to social change merged with his creatively flexible administrative skills to found the Graduate Program in Sociology at Binghamton University, SUNY. The student-centered, autonomous program fostered the formation of critically minded scholars who pursue transdisciplinary sociology while fusing deeply personal commitments to long-term, large-scale social change. In this significantly updated twentieth anniversary second edition of *Mentoring, Methods, and Movements*, Terence K. Hopkins's former students, organizing and contributing to a colloquium in his honor a few months before his untimely passing in January 1997, share key insights about what made him so unique and impactful in shaping their practices of engaged sociology informed by an always open, dynamic, and self-reinventing World Systems Analysis. The new edition includes a comprehensive chronological works-citations bibliography of Terence K. Hopkins, a new postscript essay reflecting and building on other contributions in the volume, updates on the contributors' background and work, a reorganized photo gallery, and cover design, and a detailed subject index that can be a helpful guide to the many aspects of Hopkins's thought and pedagogy from the points of view of his students and colleagues. From the Inside: For several years now, we sociologists have heard much talk about structure and agency. This distinction can make little sense to students of Hopkins, who always insisted that social structures are formed, reproduced, and reformed by the agency of actors. Walter Goldfrank, U.C. Santa Cruz. How

did Terry do it William G Martin Binghamton University Hopkins's insistent questioning opened the door to the creation of an alternate apparatus of discourse the very flexibility of which allows the emerging debates of world scale historical social sciences to be joined Ravi A Palat Binghamton University Hopkins was attacking the idiographic nomothetic distinction through the pedagogy The pedagogy assumed that the student had to work hard as a student inventing and then had to continue inventing forever after Immanuel Wallerstein Yale University But then again I cannot think of a better way to reflect on Hopkins's work than approaching it from a personal perspective That is how he always approached his own work after all and he encouraged us to do so as well Resat Kasaba University of Washington The vision of methods Terence Hopkins has offered includes this invitation to a special sort of imaginative social action think the past to make a past with the purpose of making the future by thinking a future Richard Lee Binghamton University This is not going to be a personal speech but the invisible hand of Terence K Hopkins lies about me and in most of what I've written since I left Binghamton Philip McMichael Cornell University The study of regionalism vis a vis globalism parallels the two poles of Terence Hopkins's own intellectual development which began with the study of small group interaction and culminated with a focus on the dynamics of the world system Elizabeth McLean Petras Scholar and Author even the Hopkins phrases were not immune to skeptical support Exhibiting his characteristic penchant for sustained auto critique Hopkins wrote in the margins of the paper Beverly Silver Johns Hopkins University He was a tireless and merciless critic Yet I never felt demeaned or belittled He pounded home time and again that it was not helpful to view race and class as binary opposites Rod Bush 1945 2013 St John's University key points in the work of Hopkins elucidate productive ways of meeting the criteria set by feminists for the study of gender World systems analysis has thus far not dealt with subjective and objective self and society as dimensions of the modern world system Critique of these as discrete units of analysis is implicit in world systems analysis but focused attention on these is the contribution of feminist theory to the discussion of unit of analysis Nancy Forsythe Feminist Scholar and Activist The time I was fortunate to spend with him allowed me to have a sense of his profound concern about the welfare of humanity and commitment to the cause of the unprivileged Lu Aiguo Inst of World Economies and Politics Chinese Academy of Social Science Beijing It was not what Hopkins actually said to me that mattered not his educational program nor even his parenthetical letters but what he is and now what he was a style of being alive a magical dance he does with his body or with you or with parts of who he was a dance in which he laughs turning away just enough to help you see it is not you he is laughing at but us Evan Stark Rutgers University Gathered in this volume are sociologically imaginative world systems analyses of Terence K Hopkins amid the world historical public issues that deeply troubled him personally and are even more prevalent today Mohammad H Tamdgidi UMass Boston OKCIR Intrastate Conflict in the Horn of Africa Bekele Bengessa Hirbe, 2020-07-15 This book identifies the most important sources of intra state conflict in the individual countries of the Horn of Africa It explores how serious the threats are to the security of the states and their people the region and it identifies

G. McGee,2001 The era of globalization is creating profound changes in global relationships changes that are manifest at international regional national and sub national levels making traditional regional development policy obsolete and irrelevant Traditional policy needs to be redefined and reconstructed so it can capture and articulate emerging regional trends and issues The first of four volumes based mainly on Global Forum on Regional Development Policy organized by the United Nations Centre for Regional Development in Nagoya Japan this book presents a broad theoretical and trend analysis of globalization and its effects on the theory and practice of regional development The book lays out the major components that merit consideration if there is to be new regional planning in this millennium While contributors to the volume do not agree on the effects of globalization on economic growth there is a consensus in the volume that globalization presents a challenge to conventional development theories The challenge for regional planners is to examine the impact and implications of recent structural changes on regional development planning and come up with viable and pragmatic regional development strategies This volume begins to meet that challenge by laying

out the major components that merit consideration The following volumes will present detailed case studies of current regional planning practices focusing largely on developing countries

*The Chinese Triangle of Mainland China, Taiwan, and Hong Kong* Alvin Y. So, Nan Lin, Dudley L. Poston, 2001-07-30 The Chinese triangle of mainland China Hong Kong and Taiwan constitutes one of the most dynamic regions in the world economy Since the late 1970s these three societies have experienced increasing economic integration however studies aimed at analyzing and explaining this integration have often overlooked the very important role social institutions have played in the shaping of this process To fill this gap this book adopts a systematic institutional approach designed to examine the different patterns of institutions in the three countries and to discuss how such social institutions as the economy gender social networks and the Chinese diaspora have exerted a profound impact on all three societies The chapters taken together argue that different patterns of institutional configuration have led to divergent paths of development and that this divergence will have significant implications on the prospects for Chinese national reunification in the twenty first century The Introductory chapter provides a historical discussion on the origins and the transformation of the Chinese triangle during the second half of the twentieth century The remainder of the volume is broken into four topics considered crucial for understanding the transformation of the Chinese triangle economic transformation gender social networks and the Chinese diaspora As globalization impacts the Chinese triangle studies that consider the issues from the perspective of social institutions will be increasingly important to understanding the area as it develops in the world economy
