Reconstructing Professionalism In University Teaching Teachers And Learners In Action:

EBOOK: Reconstructing Professionalism In University Teaching Melanie Walker,2001-07-16 How can academics carve out new and effective ways of working with students against a background of constant change and policy pressure How can university teachers both enhance student learning and realize their own educational values What might be the shape of a new professionalism in university teaching At the heart of this book is a small group of academics from very different disciplines making sense of their teaching situations We witness each of their struggles and celebrations in designing a new course engaging a large first year class introducing a mentoring programme nurturing independent learning through project work using debates to develop students critical thinking and evaluating the success of their teaching This book is the story of a higher education project and central to the story are the attempts of university teachers to enact a critical professionalism in their everyday lives in teaching and learning and also their development of a shared and collaborative dialogue Each of the team seeks not only to improve their practice of teaching but also to explore amongst themselves what kind of professional they want to be and how to realize it in their work with students **Reconstructing Professionalism in University Teaching** reveals how academics working together on researching their own teaching can both improve their students learning and start to redefine their own professional roles

The Moral Foundations Of Educational Research Sikes, Pat,Nixon, John,Carr, William,2003-04-01 This book considers what is distinctive about educational research in comparison with other research in the social sciences As the contributors all agree that education is always an essentially moral enterprise discussion about methodology starts not with the widely endorsed claim that educational research should be useful and relevant but with the attempt to justify and elaborate that claim with reference to its moral foundations

Academic Working Lives Lynne Gornall,Caryn Cook,Lyn Daunton,Jane Salisbury,Brychan Thomas,2014-01-30 Provides a fine grained multidisciplinary multi context and inclusive set of approaches to the challenges and complexities within contemporary academic working lives

Teacher Agency and Policy Response in English Language Teaching Patrick C. L. Ng,Esther F. Boucher-Yip,2016-08-05 The role of English in the global arena has prompted official language in education policy makers to adopt language education policies to enable its citizens to be proficient in English and to access knowledge Local educational contexts in different countries have implemented English education in their own ways with different pedagogical goals motivations features and pedagogies While much of the research cited in English language planning policy has focused on macro level language policy and planning there is an increasing interest in micro planning in particular teacher agency in policy response Individual teacher agency is a multifaceted amalgam not only of teachers individual histories professional training personal values and instructional beliefs but also of how these interact with local interpretations and appropriations of policy **Teacher Agency and Policy Response in English Language Teaching** examines the agency of the teacher in negotiating educational reforms and policy changes at the local and national levels Chapters in the book include English

language teaching in China teacher agency in response to curricular innovations Incorporating academic skills into EFL curriculum teacher agency in response to global mobility challenge Teacher agency the native nonnative dichotomy and English Classes in English in Japanese high Schools Teacher designed high stakes English language testing washback and impact This book will appeal to researcher across all sectors of education in particular key stakeholders in curriculum and language planning Those interested in the latest development of English language teaching will also find this book a valuable resource

[A Will To Learn: Being A Student In An Age Of Uncertainty](#) Barnett, Ronald,2007-10-01 This book examines the structure of what it is to have a will to learn and offers an idea of student development that challenges current dominant views

[Higher Education for the Public Good](#) Brenda Leibowitz,2012-11-01 The authors of this inspiring collection discuss philosophical approaches and present empirical and practical ideas for teaching and learning at university for the public good Four major aspects of transforming universities are explored the purpose and ethos of the university its conception of graduate attributes the way programmes and teaching are delivered and the institution s approach to academics and their professional development The book will be indispensable to all universities who are evaluating their own principles and practice

Authentic Professional Learning Ann Webster-Wright,2010-08-05 There is considerable and growing interest in professionals learning across their working lives The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professionals or para professional workers in advanced industrial economies Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self regulated manner Of course many other kinds of employment also demand such behaviours However there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health legal and financial matters Part of this attention derives from expectations within the community that those who are granted relative autonomy and are often paid handsomely should be current and informed in their decision making Then like all other workers professionals are required to maintain their competence in the face of changing requirements for work Consequently a volume that seeks to inform how best this ongoing learning can be understood supported and assisted is most timely and welcomed This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning What is proposed here is that in contrast to programmatic approaches towards professional development the process of continuing professional learning is a personal complex and diverse process that does not lend itself to easy prescription or the realisation of others intents

Reclaiming Universities from a Runaway World Melanie Walker,Jon Nixon,2004 Examines the idea that the defining feature of academic professional identity is the search for understanding This work shows how questions of teaching research and management in universities are also questions about the struggle over deliberative democracy It details how higher education can contribute to building a prosperous society

Critical Citizens for an Intercultural World Manuela Guilherme,2002 This

book examines the acquisition of requests in English by a seven year old Japanese girl during her 17 month residence in Australia The study focuses on the linguistic repertoire available to the child as she attempts to make requests and vary these to suit different goals and addressees This book helps unravel features of pragmatic development in the child s interlanguage a subject about which we yet know very little
