## **Recycled Materials In Geotechnics:**

*Recycled Materials in Geotechnics* Ahmet H. Aydilek, Joseph Wartman, 2005 GSP 127 contains 15 papers highlighting the use of recycled materials in geotechnics presented in sessions of the ASCE Civil Engineering Conference and Exposition held in Baltimore Maryland October 19 21 2004

**Recycled Materials in Geotechnical and Pavement Applications** Amin Chegenizadeh, Hamid Nikraz, 2022-02-28 This book considers the application of recycled materials both in pavement and geotechnical engineering Currently Australia has faced the fundamental concern of recycling waste plastic On 1 January 2018 China enforced a prohibition on the importation of waste plastic China's ban is followed by other countries like India Indonesia and Malaysia The ban caused many corporations to abandon waste collection agreements and the stockpiling of waste as there is nowhere to safely deposit this waste This issue seems to a great extent to have placed Australia's recycling industry in a crisis As a result local councils will have to find strategic ways of recycling accumulated waste that will become a more significant issue in the coming years In Australia apart from economic growth the road pavement has weakened rapidly as the current pavement unable to withstand this urgent traffic load demand The adding of polymers to the mixtures improves the stiffness rutting resistance and fatigue cracking 1 However the application of virgin polymer is costly Thus using waste polymer such as waste plastic polymer is an inexpensive substitute The potential for recycled plastic to improve the performance properties of asphalt mixtures has been demonstrated in many countries the UK Canada The Netherlands and India 2 Similarly another application of recycled materials can be in geotechnical infrastructure This book considers the application of recycled materials both in pavement and geotechnical engineering

**Recycled Materials in Geotechnics**, 2004 **Recycled Materials in Geotechnics**, 2004 [Recycled Materials in Geotechnics \(GSP 127\)](#), 2004 **Geomechanics and Geotechnics of Particulate Media** Masayuki Hyodo, Hidekazu Murata, Yukio Nakata, 2017-12-14 Microscopic re-examination of geomaterials consisting of aggregates can shed light on macroscopic behaviour including compressibility anisotropy yielding creep cyclic liquefaction and shear rupture As a result of this process of examination new methods of material characterization emerge leading to a greater degree of accuracy in the specification of new constitutive models with physically meaningful parameters The impetus behind this development is an increasing awareness on sustainability leading to the more efficient use of recycled materials for geotechnical applications

The characteristics of recycled materials such as compressibility and self hardening may differ significantly from those of natural materials and it is crucial that evaluation is made from a specifically particulate perspective

**Transportation Geotechnics for Green, Digital, and Modern Infrastructures** António Gomes Correia, Alexandre Pinto, José Neves, Eduardo Fortunato, 2026-03-10 This book looks into the future of transport infrastructures through green transition digital transformation and modern transport infrastructure It is divided into three parts The first part provides an overview of green transition in transport infrastructures eco design and life cycle assessment recycled and alternative materials and bio based materials and technologies This is preceded by an overview of related initiatives in the EU and the US The second part describes intelligent and digital transformation aspects in geotechnical engineering including geotechnical databases sensing and monitorization and machine learning tools and optimization The third part presents transport infrastructure case studies that demonstrate the contribution of geotechnical engineering to creating smarter more efficient more resilient and more sustainable infrastructures With 14 chapters this book serves as a reference tool for academics and engineers in the fields involved or interested in the design construction and maintenance of transportation geotechnical infrastructures
