Red Barcelona Social Protest And Labour Mobilisation In The Twentieth Century:

Red Barcelona Angel Smith,2003-08-27 As one of Europe s great industrial and revolutionary centres Barcelona has been in need of a detailed social and cultural history yet there is actually a paucity of detailed research This book redresses the balance Focusing on the entire twentieth century it allows for the emergence of long term trends and deals with both classic and newer themes of labour history This novel and authoritative work will interest not only those working on Spain but all scholars and students of comparative history

Democracy, Trade Unions and Political Violence in Spain Richard Purkiss,2011 Drawing on a range of previously underused primary sources this title shows that not only was Valencia a hugely important source of anarchist support but that the local movement was far more radical than has previously been thought

Interurban Knowledge Exchange in Southern and Eastern Europe, 1870-1950 Eszter Gantner,Heidi Hein-Kircher,Oliver Hochadel,2020-10-22 Around 1900 cities in Southern and Eastern Europe were persistently labeled backward and delayed Allegedly they had no alternative but to follow the role model of the metropolises of London Paris or Vienna This edited volume fundamentally questions this assumption It shows that cities as diverse as Barcelona Berdyansk Budapest Lviv Milan Moscow Prague Warsaw and Zagreb pursued their own agendas of modernization In order to solve their pressing problems with respect to urban planning and public health they searched for best practices abroad The solutions they gleaned from other cities were eclectic to fit the specific needs of a given urban space and were thus often innovative This applied urban knowledge was generated through interurban networks and multi directional exchanges Yet in the period around 1900 this transnational municipalism often clashed with the forging of urban and national identities highlighting the tensions between the universal and the local This interurban perspective helps to overcome nationalist perspectives in historiography as well as outdated notions of center and periphery This volume will appeal to scholars from a large number of disciplines including urban historians historians of Eastern and Southern Europe historians of science and medicine and scholars interested in transnational connections
