Red Fascism Polish Revolution 1980:

Red Fascism Andrew Targowski, Andrzej Targowski, 1982 **The Polish Crisis-- Solidarity and Martial Law** Amos Lakos, 1987 The Alternative Media in Poland 1976-1989 Tomasz Piotr Przytula, 1995 The History, Present State, and Future of Information Technology Andrew Targowski, 2016

In Part I Prof Targowski takes us through the evolution of modern computing and information systems While much of this material is familiar to those of us who have lived through these developments it would definitely not be familiar to our children or our students He also introduces a perspective that I found both refreshing and useful looking at the evolution on a country by country basis For those of us who live in the U S it is all too easy to imagine that evolution to be a purely local phenomenon I found my appreciation of the truly global nature of computing expanding as he walked me through each country s contributions In Parts II and III constituting nearly half of the book Targowski provides what I would describe as an in depth case study of the challenges and successes of informatics in Poland As he tells each story many of which involved him personally the reader cannot help but better understand the close relationship between the freedoms that we in the west take for granted and the ability to produce innovations in IT Even after Poland left the orbit of the former Soviet Union the remaining vestiges of the old way of thinking remained a major impediment to progress Being right and being rigorous were far less important than being in tune with the approved ways of thinking There are important lessons to be learned here particularly as we try to project how IT will evolve in rapidly developing economies such as China But from my experience they apply equally well to western academia where moving outside of preferred values and patterns of research can lead a scholar to be ignored or even disparaged In Part IV Targowski presents a bold forward looking synthesis of informatics and informing science in the future Building upon articles recently published in *Informing Science The International Journal of an Emerging Transdiscipline* he presents a conceptual scheme of historical informing waves that builds upon historians such as Toynbee He then considers how these trends will necessarily force us to rethink how we develop and apply IT He does not steer away from the controversial But he also provides cogent arguments for all his predictions and recommendations

Die revolutionären Umbrüche von 1989 1991 veränderten Europa fundamental Noch während die Ereignisse in vollem Gange waren gewannen einzelne Bilder und Motive eine enorme Symbolkraft und bildeten sich erste Meistererzählungen heraus Bewusst inszeniert oder kommunikativ gewachsen entfalten sie ihre Wirkung bis heute Auch blieben sie in den vergangenen 30 Jahren stark umkämpft Unser heutiges Verständnis und unser heutiger Umgang mit den Ereignissen von 1989 1991 ist entscheidend von den Repräsentationen und Deutungen der letzten 30 Jahre geprägt Der vorliegende Band thematisiert diese unterschiedlichen und wechselhaften Sinnstiftungen des Umbruchs von 1989 1991 in europäisch vergleichender Perspektive Beginnend mit einer kritischen Hinterfragung des Revolutionsbegriffs werden die Genese der Bildgedächtnisse sowie kontroverse Erinnerungsorte und aktuelle
