Making Molding Identity In Schools:

Making and Molding Identity in Schools Ann Locke Davidson,1996-01-01 Delves into the lives and words of adolescents to examine how they assert their ethnic and racial identities within school settings [Resources in Education](#) ,1997 *Handbook of Research in the Social Foundations of Education* Steven Tozer,Bernardo P. Gallegos,Annette Henry,Mary Bushnell Greiner,Paula Groves Price,2011-07-05 This groundbreaking volume helps readers understand the history evolution and significance of this wide ranging often misunderstood and increasingly important field of study

Identity and Schooling Among the Naxi Haibo Yu,2010-01-01 Identity and Schooling among the Naxi examines the identity construction of Naxi students in Lijiang No 1 Senior Secondary School in China focusing on the changing roles of school community and family in the identity construction of the students Through participant observation interviews and student essays Yu finds that Naxi students of the school retain a strong Naxi identity while also managing to fit into mainstream culture through a process she characterizes as harmonious creative identity engagement Three main forces affecting the identity construction of the Naxi students are highlighted the state and the school Naxi intellectuals and socialization in the family and community As an institution of the state the school conveys national ideology and instills a sense of ethnic unity and an understanding of the culture of the Chinese nation However the school also takes an active role in ethnic identity construction of the Naxi students At the same time Naxi intellectuals through their research publications and responses to state policies preserve and revitalize Naxi culture Socialization within the community and family allows the Naxi students to learn about their heritage These factors result in both an asserted and assigned identity of the Naxi

MultiCultural Review ,1997 **Prospects** ,1998 *Constructing Bridges to Learning* Juliet Mae Yao,1999 [Claims to Belonging and Difference](#) Joy L. Lei,2001 **Bringing the Internet to School** Janet Ward Schofield,Ann Locke Davidson,2002-03-05 Presenting the results of the first major study of technology implementation in schools examining the positive and negative consequences of the Internet on equity academics and social life the authors draw on over 300 interviews with teachers students and administrators done over the course of five years and offer an assessment of the underlying cultural issues that will ultimately determine the speed and success of technology integration **Contesting Stereotypes and Creating Identities** Andrew J. Fuligni,2007-05-31 Since the end of legal segregation in schools most research on educational inequality has focused on economic and other structural obstacles to the academic achievement of disadvantaged groups But in *Contesting Stereotypes and Creating Identities* a distinguished group of psychologists and social scientists argue that stereotypes about the academic potential of some minority groups remain a significant barrier to their achievement This groundbreaking volume examines how low institutional and cultural expectations of minorities hinder their academic success how these stereotypes are perpetuated and the ways that minority students attempt to empower themselves by redefining their identities The contributors to *Contesting Stereotypes and Creating Identities* explore issues of

ethnic identity and educational inequality from a broad range of disciplinary perspectives drawing on historical analyses social psychological experiments interviews and observation Meagan Patterson and Rebecca Bigler show that when teachers label or segregate students according to social categories even in subtle ways students are more likely to rank and stereotype one another so educators must pay attention to the implicit or unintentional ways that they emphasize group differences Many of the contributors contest John Ogbu s theory that African Americans have developed an oppositional culture that devalues academic effort as a form of acting white Daphna Oyserman and Daniel Brickman in their study of black and Latino youth find evidence that strong identification with their ethnic group is actually associated with higher academic motivation among minority youth Yet as Julie Garcia and Jennifer Crocker find in a study of African American female college students the desire to disprove negative stereotypes about race and gender can lead to anxiety low self esteem and excessive self defeating levels of effort which impede learning and academic success The authors call for educational institutions to diffuse these threats to minority students identities by emphasizing that intelligence is a malleable rather than a fixed trait

Contesting Stereotypes and Creating Identities reveals the many hidden ways that educational opportunities are denied to some social groups At the same time this probing and wide ranging anthology provides a fresh perspective on the creative ways that these groups challenge stereotypes and attempt to participate fully in the educational system
