Making Sense Of Intermediate Care:

Making Sense of Intermediate Care John Unsworth, 2004-05-31 A timely addition to the debate about intermediate care and informs members of the primary health care team about the developments of services and how they might be involved or affected by the changes

The Dynamics of Care Eric Wolstenholme, Douglas McKelvie, 2019-10-10 This book describes numerous projects which shed light on some of the most persistent issues of the day in health and social care The work demonstrates the importance of embedding the concept of flow into everyday health and social care thinking and creates insights into patient journeys through different conditions and treatments It suggests that improving throughput across agencies is the key way to improving the performance of health treatment whereas increasing capacity is the key way to improving the performance of social care by retaining independent living The authors conclude that for state provided care balancing health and social care provision can eliminate the many stressful fire fighting strategies hospitals have to undertake when faced with high demands and this is a win win scenario in terms of patients staff and costs Further that there is a need for better understanding of the dynamics of population ageing the dynamics of health conditions and the provision of better integrated information systems The book will be a valuable resource for practitioners clinicians managers and academics in health social work public health and public policy in many countries In this important book Eric Wolstenholme and Douglas McKelvie bring two lifetimes of award winning experience in applying system dynamics to improving our very clinically advanced but often dysfunctional care systems David F Andersen O Leary Distinguished Service Professor Emeritus State University of New York Albany USA Health and social care suffer from some persistent and serious problems which not only undermine well intended care but also impose considerable costs in many societies This very welcome and exceptional book offers the hope of sound and sustainable solutions to many of these issues Kim Warren Strategy Dynamics London UK

Handbook of Integrated Care Volker Amelung, Viktoria Stein, Esther Suter, Nicholas Goodwin, Ran Balicer, Anna-Sophia Beese, 2025-11-03 This handbook shares profound insights into the main principles and concepts of integrated care It offers a multi disciplinary perspective with a focus on patient orientation efficiency and quality by applying widely recognized management approaches to the field of healthcare The handbook also highlights international best practices and shows how integrated care can work in various health systems In the majority of health systems around the world the delivery of healthcare and social care is characterised by fragmentation and complexity Consequently much of the recent international discussion in the fields of health policy and health management has focused on the topic of integrated care Integrated acknowledges the complexity of patients needs and aims to meet them by taking into account both health and social care aspects Changing and improving processes in a coordinated way is at the heart of this approach The third edition offers new chapters on people centredness complexity theories and evaluation methods additional management tools and a wealth of experiences from different countries and localities It is essential reading both for health policymakers

seeking inspiration for legislation and for practitioners involved in the management of public health services who want to learn from good practice

The Role of Family Physicians in Older People Care Jacopo Demurtas, Nicola Veronese, 2021-12-30 This book provides family doctors with a wealth of evidence based indications and tips regarding geriatric medicine and approaches for the management of older patients to be applied in daily practice After discussing old and new features of healthy ageing and the approaches required in Family Medicine Consultation the text introduces key elements of geriatric medicine such as frailty sarcopenia and the comprehensive geriatric assessment CGA before describing a range of characteristics unique to older patients in different contexts with a dedicated section on Palliative Care The role of polypharmacy and the importance of quaternary prevention and deprescribing are also addressed Finally the book emphasizes both the importance of a humanistic approach in caring and the approach of research and meta research in geriatrics Though many texts explore the role of primary care professionals in geriatric medicine the role of family doctors in older people care has not yet been clearly addressed despite the growing burden of ageing which has been dubbed the silver tsunami Family physicians care for individuals in the context of their family community and culture respecting the autonomy of their patients In negotiating management plans with their patients family doctors integrate physical psychological social cultural and existential factors utilizing the knowledge and trust engendered by repeated visits They do so by promoting health preventing disease providing cures care or palliation and promoting patient empowerment and self management This will likely become all the more important since we are witnessing a global demographic shift and family doctors will be responsible for and involved in caring for a growing population of older patients This book is intended for family medicine trainees and professionals but can also be a useful tool for geriatricians helping them to better understand some features of primary care and to more fruitfully interact with family doctors

Understanding Disability Policy Alan Roulstone, Simon Prideaux, 2012-01-18 In an era of scarce social resources the question of the changing social policy constructions and responses to disabled people has become increasingly important Paradoxically some disabled people are realising new freedoms and choices never before envisioned whilst others are prey to major retractions in public services and aggressive attempts to redefine who counts as genuinely disabled Understanding disability policy locates disability policy into broader social policy and welfare policy writings and goes beyond narrow statutory evaluations of welfare to embrace a

range of indicators of disabled people's welfare. The book critically explores the roles of social security, social support, poverty, socio-economic status, community safety, official discourses, and spatial change in shaping disabled people's opportunities. It also situates welfare and disability policy in the broader conceptual shifts to the social model of disability and its critics. Finally, it explores the possible connection between changing official and academic constructions of disability and their implications for social policy in the 21st century. The book is supported by a companion website containing additional materials for both students and lecturers using the book, which is available from the link above: [Medicare and Medicaid Guide](#), 1969. **Evaluation of the Adult Day Care**, 1983. [California. Court of Appeal \(4th Appellate District\). Division 2. Records and Briefs](#) California (State)., [Nursing in the 1980s](#) Linda H. Aiken, Susan R. Gortner, 1982. Since it was first published in 1955, *A Short History of Medicine* has been hailed as the best available book of its kind, a concise and readable introduction to the history of medicine written for students and professionals alike. This new revised edition of Erwin H. Ackerknecht's classic volume is now available in paperback, making the book especially suitable for classroom use. *BNA's Health Care Policy Report*, 1995. This publication argues that no health care system can do everything that is beneficial nor should it try to. The way forward therefore is the best management of the inevitable gap between supply and demand. To show how this can be achieved, the book sets out the case for the way the NHS is currently financed and looks at the tensions caused by this funding, past and present, to show how to proceed to a better future. *The Public Perspective* California Performance Review Commission, 2004. The CPR Commission was mandated to gather public perspective in an open and inclusive process. This publication contains summaries of public opinion gathered by the CPR Commission, including recommendations for state government reform.
