Man Computer Ape Or Angel:

Man Larry Azar, 1989 **A Philosophy of the Human Being** Julian A. Davies, 2009-02-26 This book is an accessible text that explores what it means to be human It is designed for an introductory course in Philosophy of the Human Being and contains an abundance of current examples with embedded quotations from philosophers and selections from contemporary writers following the chapters The author provides an introduction to philosophy then discusses the topics of human sociability intelligence freedom duality individuality and immortality He concludes by highlighting the contrast between realism and materialism This systematic approach focuses on issues with a minimum of metaphysical superstructure and jargon and provides connections between the readings Apes and Angels Ben Bova, 2016-11-22 Arriving at Mithra Gamma the third planet of the star Mithra to protect its stone age inhabitants from the Death Wave the crew of the *Odysseus* is confronted by threats that force them to defend themselves **Apes or Angels?** Cornelius J. Troost, 2007-03-16 APES or ANGELS A Summary For many readers this book will be a mind altering experience It has a thesis that is a challenge to the conventional thinking of most Christians and their counterparts the secular humanists It offends both for very good reasons It speaks the truth about Darwin s views on human origins and race Contrary to the beliefs of most academicians and educated readers Darwin had two dangerous ideas instead of one Daniel Dennett was perfectly right about the first which was the notion that natural selection operated in a way that precluded explanatory intrusions from outside the natural world In other words metaphysics has no place in biological explanation Things spiritual like vitalism and finalism are simply inapplicable to evolutionary biology The second idea is rarely mentioned in politically correct America that the human races are different in sometimes significant ways Indeed inequality is a normal condition of nature Darwin s clash with Christianity is winding down because modern science is a foundation of western culture and it fully accepts the truth of natural selection and the evolution of life including man It is ironic that as the struggle with Christianity declines a new struggle emerges the battle over racial differences Liberalism evolved into radical egalitarianism as it swept over America creating an authoritarian political correctness that contradicts our Constitution Modern genetics now threatens the liberal myth of human equality These Darwinian conflicts are playing out amidst our culture wars a battle that could transform us into another Brazil Radical egalitarianism and multiculturalism are ideologies aimed at dismantling our great Anglo European tradition Forces of erosion are at work which may make our nation s greatness a faint memory The battle with creationism is essentially over in Europe and it is winding down in the U S Science always wins fights over the facts of nature Eddies of ignorance will persist in American society where fundamentalism exists but educated elites have long since agreed with Darwin Liberal relativism erodes our standards of excellence and even undermines our Christian morality a morality that seems closely connected to our moral instinct With their power in academia liberals will submit to white guilt as they treat blacks as eternal victims distorting reality to make outcomes equal Darwin however may be vindicated on the matter of real

racial differences causing agony among idealistic liberals who must relinquish their lofty dreams Scientific humanism has always touted critical thinking as a supreme goal of education but it is threatened by the irrational side of liberalism that savors post modern subjectivism Today we see diversity training imposed on young people in a Stalinist manner Propaganda and groupthink are current weapons of the PC martinets In reading this survey of how Darwin came to his dangerous ideas you may appreciate how important science and critical thinking are in a society gripped by wayward versions of liberalism Both evolution by natural selection and racial differences are discussed in this book in order to illumine Darwin s two dangerous ideas one that threatened Christianity and one that now threatens liberal humanism s egalitarian dream Social scientists will be exposed as propagandists for radical egalitarianism rather than as true scientists The movement to eliminate the word race is evidence of political motivation rather than scientific honesty To examine the conflicts related to Darwinism the book includes a brief treatment of Darwin s life and works the battle against creationism the case against supernaturalism a brief survey of human evolution and a review of current issues bearing upon human nature and race Open debate over this book will be a healthy antidote for the fearful silence in America I hope you engage in this debate and send me any comments or criticisms at Njtjrt aol com [Cartesian Nightmare](#) Peter A. Redpath,2022-06-08 This book challenges the presupposition among professional philosophers that Ren Descartes is the Father of Modern Philosophy It demonstrates by intensive textual analysis of Descartes s Discourse and Meditations that he inaugurated a new type of sophistry rather than a new way of conducting philosophy Transcendental Sophistry is a synthesis of Renaissance humanism and Christian theology especially the theology of creation This striking re evaluation of the achievement of Descartes opens the history of Western philosophy to radical reinterpretation **The Politician's Guide to Assisted Suicide, Cloning, and Other Current Controversies** George J. Marlin,1998 Author George Marlin argues that without respect for personhood liberty will become license and the responsibility to do what is right will degrade into the right to do what is irresponsible Aren t we already there This book provides intelligent politicians and others with philosophical and historical perspectives on some of the toughest issues we Americans face **Uniform Trade List Annual** ,1977 [Books in Print Supplement](#) ,1988

first time by noted thinkers who rigorously deploy the tools of modern thought to re-examine and restate the central insights of classical philosophy. In natural theology the contributors address the challenge of influential varieties of skepticism while developing a cogent and coherent framework of thought to defend the existence as well as the simplicity, immutability, goodness, and infinity of God. In philosophy of mind they counter modern materialisms with an extensive defense of the existence of a mental reality which is radically nonphysical. In moral philosophy the contributors consider the contradictions of relativism and the application of rationally defensible norms to contemporary ethical debates. The final section comprises a critique of syncretism in comparative religion and a phenomenological analysis of the New Testament's Jesus. **The**

Writer's Market Aron M. Mathieu, 1989 Angelicum, 1990 Being and Becoming F. F. Centore, 1991-01-30
Contemporary society according to F. F. Centore is dominated by a post-modern philosophical world view. Therefore he argues it behooves the educated individual to know what this perspective means where it came from and where it is taking humankind. Lacking until now from the many works that have been written on post-modernism is one that scrutinizes its fundamental assumptions and presuppositions. Being and Becoming fills this need by synthesizing the key developments in contemporary post-modernism. By taking the reader through the various historical periods and developments which have led to the current situation, Centore shows how that which is now taken for granted by the vast majority of people is not necessary for either philosophical or theological reasons. Moreover, he shows that post-modernism is not required as the rational foundation for personal freedom, privacy, and creativity. Centore offers an alternative solution to the basic problems that lie at the root of post-modern philosophy. The comprehensive rational and scientific approach that he advocates would, he argues, render post-modernism irrelevant and unnecessary. Our intellectual and social-political life would be much better without post-modern doctrine and with a more rational, emotionally satisfying philosophy of being and becoming. Centore's work is certain to prove controversial but deserves to be given careful attention by anyone seriously interested in understanding the contemporary world. *From Apes to Angels* Phillip V. Tobias, 1990-11-21 A tribute to the renowned anthropologist Phillip V. Tobias on the occasion of his retirement from the Chairmanship of the Department of Anatomy and Human Biology, University of the Witwatersrand, Johannesburg. It contains 24 essays by 26 authors on such topics as cultural anthropology, genetics, pathology, paleoanthropology, and human biology. The authors, a majority of whom are internationally recognized in their fields, contribute up-to-date and authoritative reviews on material illustrating the diversity of Dr. Tobias' interests. Includes extensive bibliographies on topics covered. Publishers Directory, 1994 *The Linacre Quarterly*, 1997
