**New Revolutions for a Small Planet** Kingsley Dennis, 2012-01-01 According to sociologist Kingsley L Dennis our current economic woes are part of a larger shift in the way our global systems function In his recent book *New Revolutions for a Small Planet* Watkins November 2012 Dennis provides a strong dose of hope for young adults everywhere especially those hit hardest by the current economic crisis According to Dennis we are witnessing the last throes of the industrial revolution model and mindset The signs are all around us he says pointing to the rise of decentralized communications the growth of NGOs and volunteerism and rising social unrest against dysfunctional political systems These are all harbingers of the next phase of our socio cultural evolution

New Revolutions looks at what young people can expect in the years ahead The birth of the empathic mind which is heralded by greater global interconnections networked communication and a participatory culture A burgeoning sense of a dynamic enchanting cosmos and the increased urge to find personal meaning and fulfillment in life Greater awareness of how new innovations will lead to creative new ways of thinking that will solve the world s current problems New systems and models that will emerge to eventually make the old models obsolete In his conclusion Dennis writes that Revolutions in communications and energy technology go together with our shifting forms of consciousness and that life upon this planet is about to undergo a period of transition that will test our capacity to re adapt and re emerge on an unprecedented scale
