African American English Cuban English and others A growing sense of unity in the discipline is reflected by recurring topics and methods across earlier boundaries between sub disciplines For instance computerized data and statistical analyses are standard tools nowadays and a few papers explicitly address the possibilities and limitations of these methods The study of variation and change of linguistic varieties has largely replaced earlier monolithic notions of dialect and the question of change in dialects the erosion of traditional speech forms under the impact of modern communication patterns and socio economic developments is investigated in several contributions In general a recent orientation towards the history and development of nonstandard varieties is reflected in the book several papers study diffusion patterns of linguistic forms or discuss the emergence of individual dialects or dialectal forms in a language contact framework Altogether the papers provide a lively illustration of and a fairly representative selection from ongoing high quality linguistic research into American English
