people respond to a major loss The types are Nomads who have not yet resolved their grief and don't often understand how their loss has affected their lives Memorialists who are committed to preserving the memory of their loved ones by creating concrete memorials and rituals to honor them Normalizers who are committed to re-creating a sense of family and community Activists who focus on helping other people who are dealing with the same disease or issues that caused their loved one's death Seekers who adopt religious philosophical or spiritual beliefs to create meaning in their lives Drawing on research results and anecdotes from working with the bereaved over the past ten years Berger examines how a person's worldview is affected after a major loss According to her findings people experience significant changes in their sense of mortality their values and priorities their perception of and orientation toward time and the manner in which they fit in society The five types of grieving she finds reflect the choices people make in their efforts to adapt to dramatic life changes By identifying with one of the types readers who have suffered a recent loss or whose lives have been shaped by an early loss find ways of understanding the impact of the loss and of living more fully
