Glenda Liu Quarnstrom

Red Earth Revolution In A Chinese Village:

Red Earth Stephen Endicott, 1991 Endicott achieved the nearly impossible permission for a foreigner to study a village in rural China the result filled with analysis and unique information about village life over many years is one of the most interesting currently available books on China Jonathan Mirsky Times Literary Supplement **Red Earth** Stephen Lyon Endicott, 1988 The Transformation of Rural China Jonathan Unger, 2016-09-16 During the past quarter century Jonathan Unger has interviewed farmers and rural officials from various parts of China in order to track the extraordinary changes that have swept the countryside from the Maoist era through the Deng era to the present day A leading specialist on rural China Professor Unger presents a vivid picture of life in rural areas during the Maoist revolution and then after the post Mao disbandment of the collectives This is a story of unexpected continuities amidst enormous change Unger describes how rural administrations retain Mao era characteristics despite the major shifts that have occurred in the economic and social hierarchies of villages as collectivization and class struggle gave way to the slogan to get rich is glorious A chapter explores the private entrepreneurship that has blossomed in the prosperous parts of the countryside Another focuses on the tensions and exploitation that have arisen as vast numbers of migrant laborers from poor districts have poured into richer ones Another based on five months of travel by jeep into impoverished villages in the interior describes the dilemmas of under development still faced by many tens of millions of farmers and the ways in which government policies have inadvertently hurt their livelihoods **Red Earth: Revolution in a Sichuan Village** Stephen Lyon Endicott, 2021-01-28 Power over Property Matthew Noellert, 2020-10-13 Following the end of World War II in 1945 the Chinese Communist Party CCP spent the next three decades carrying out agrarian reform among nearly one third of the world's peasants This book presents a new perspective on the first step of this reform when the CCP helped redistribute over 40 million hectares of land to over three hundred million impoverished peasants in the nationwide land reform movement This land reform the founding myth of the People's Republic of China 1949 present and one of the largest redistributions of wealth and power in history embodies the idea that an equal distribution of property will lead to social and political equality Power Over Property argues that in practice however the opposite occurred the redistribution of political power led to a more equal distribution of property China's land reform was accomplished not only through the state's power to define the distribution of resources but also through village communities prioritizing political entitlements above property rights Through the systematic analysis of never before studied micro level data on practices of land reform in over five hundred villages Power Over Property demonstrates how land reform primarily involved the removal of former power holders the mobilization of mass political participation and the creation of a new social political hierarchy Only after accomplishing all of this was it possible to redistribute land This redistribution moreover was determined by political relations to a new structure of power not just economic relations to the means of production The experience of China's land reform complicates our understanding of the relations between

economic social and political equality On the one hand social equality in China was achieved through political not economic means On the other hand the fundamental solution was a more effective hierarchy of fair entitlements not equal rights This book ultimately suggests that focusing on economic equality alone may obscure more important social and political dynamics in the development of the modern world

Cultural Differences between the West and East Asia and their Impacts on Global Economy Diana S. Kwan, Fu-Lai Tony Yu, 2026-04-07 Most works on Asian or global studies adopt mainstream Neoclassical methods to explain economic and social development However quantitative and optimisation techniques are unable to provide a deep understanding of policy change between the West and East Asia To fill the gap this book uses evolutionary perspective to interpret economic and social transformations of two global powers namely the United States and China Specifically this book outlines the roles of culture institutions and entrepreneurship in the analysis Instead of logical empiricism in the English tradition our approach is interpretative and storytelling in continental European tradition In other words we adopt hermeneutics and phenomenology in the analysis and apply humanity to economics There are two aims of this book First it outlines the evolution of Austrian evolutionary economics and second the role of learning in the decision making process It focuses on how decision makers learn and how good and bad learners are differentiated *Tumult from Within* Yang Su, 2003

Village Governance in North China Huaiyin Li, 2005-03-09 A study of village governance in late nineteenth and early twentieth century China that reinterprets peasant behavior village community and state society relations

The Mosuo -- Beyond the Myths of Matriarchy Eileen Rose Walsh, 2001

The Political Economy of Rural Reform in Post-Mao China Glenda Liu Quarnstrom, 1994

The Political Economy of Rural Development in China, 1978-1999 Weixing Chen, 1999-11-30 Chen provides an analysis of the political economy of rural development in China during the reform era Revolving around the central theme of statecraft Chen s study gives a concise and comprehensive treatment of the interaction of ideology and politics with central policy and economic growth He examines China s economic reform in historical perspective characterizes China s economic and political transformation since the reform and proposes that the Chinese Communist Party is being transformed into a party of economics while China s ideology is becoming market oriented communal socialism In addressing the issue of the Chinese path of development Chen discusses the role of local party organizations in China s modernization drive and the microform of market oriented communal socialism in the newly emerged village conglomerate highlights the challenges that China faces at the turn of the new century after 20 years of economic reform and analyzes the context of the introduction of village elections in 1990 and the establishment of Deng Xiaoping s Theory as a new ideological discourse at the 15th National Congress as well as the rationale behind them In examining the connection between the two goals of statecraft improving people s welfare and strengthening the state and between central policies and local initiatives Chen provides a study that will be of great interest to scholars students and other researchers involved with contemporary Chinese politics and development *PDRC Currents*
