Stalin's Successors Seweryn Bialer, 2001 This book provides a comprehensive overview of the ways in which the structure and process of Soviet politics have been transformed since Stalin's death and particularly during the years of the Brezhnev regime In explaining the Soviet Union's political stability the author analyzes the Soviet combination of harsh authoritarian rule with political flexibility in the treatment of its citizens and he describes the social processes that contribute to this stability He also analyzes the Soviet perception of the current international situation and discusses trends in Soviet foreign policy including the imbalance between military power on the one hand and political economic ideological and cultural resources on the other Professor Bialer explains the Soviet concept of détente and explores the difference between Soviet and American perceptions of this process A major part of the work is devoted to an examination of the imminent succession of the Soviet leadership The book gives a profile of the new generation of potential leaders and identifies the characteristics that make them different from those whom they will replace The Soviet leadership while embroiled in its succession struggle will have to make difficult decisions concerning the allocation of national resources and overall changes in management planning and incentives Professor Bialer concludes by analyzing the kinds of economic reform that could make the problems manageable and the conditions under which the new Soviet leadership will need to institute reforms

Sullivan, 2021-09-15 The war in Vietnam achieved almost none of the goals the American decision makers formulated and it cost more than 56 000 American lives Yet until recently Americans have preferred to ignore the causes and consequences of this disaster by treating the war as an aberration in United States foreign policy an unfortunate but unique mistake What are the lessons of Vietnam Many previous discussions have focused on narrow or misleading questions rehashing military decisions for example or offering blow by blow accounts of Washington infighting or castigating foreign policy decision makers Michael Sullivan undertakes instead a broad and systematic treatment of the American experience in Vietnam using a variety of theoretical perspectives to study several aspects of that experience including the decision making process and decision makers perceptions of the war public opinion and mood before during and after the war and the Vietnam War in relation to the Cold War and to power structures and patterns of violence in the international system The major goal of *The Vietnam War A Study in the Making of American Policy* is to show that the American experience not only in Vietnam but elsewhere in the world must be understood as an integral part of the processes of both American foreign policy and international politics Sullivan demonstrates the importance of using a variety of empirical and quantitative evidence to study foreign policy and of relating a specific historical situation like the Vietnam War to broader theories of international relations **Problems of Peace, Third Series ; Lectures Delivered at the Geneva Institute of International Relations, August, 1928.
