Abstract

This paper introduces process-pattern.app, a website consolidating Business Process Redesign (BPR) patterns from the literature and the field. The site seeks to enhance the usability of BPR patterns by providing features such as case studies, cheat sheets, and suggestions for pairing individual patterns. Process-pattern.app seeks to inspire creative thinking in process improvement and bridge the gap between academic knowledge and practice application. This work contributes to the BPM field by fostering a shared learning environment.

1. Introduction

The undeniable importance of efficient Business Process Management (BPM) in today's organizations is well recognized. An essential activity of BPM is Business Process Redesign (BPR) (not to be confused with business process re-engineering), which focuses on reshaping business processes to enhance goal achievement and improving process performance [1]. Often, BPR relies on innovative thinking and creative ideas for process improvement [2]. Research in BPM is dedicated to developing methodologies that bolster BPR efforts. In response to this, the BPM community is tasked with creating tools that facilitate the practical application of these methods for practitioners and researchers alike [3]. One method to express, document, and share BPR knowledge is using BPR patterns, often referred to as best practices or redesign heuristics. A pattern is an abstract solution intended to solve distinct issues by leveraging pre-existing knowledge rather than reinventing the wheel [4, p. 2]. One of the strengths of patterns is that they are sufficiently specific to tackle the problem at hand. Yet, they maintain a level of generality that allows them to address potential future problems [4, p. 2]. BPR patterns in specific "suggest particular changes to an existing process to influence its operation in certain ways" ([5, p. 193]). In this context, patterns can stimulate the creativity required for [6, 2]. One example of a BPR pattern is the *knock-out pattern*, wherein a workflow requires multiple
