*Remapping Reality* John A. McCarthy, 2006-01-01 This book is about intersections among science philosophy and literature It bridges the gap between the traditional cultures of science and the humanities by constituting an area of interaction that some have called a third culture By asking questions about three disciplines rather than about just two as is customary in research this inquiry breaks new ground and resists easy categorization It seeks to answer the following questions What impact has the remapping of reality in scientific terms since the Copernican Revolution through thermodynamics relativity theory and quantum mechanics had on the way writers and thinkers conceptualized the place of human culture within the total economy of

existence What influence on the other hand have writers and philosophers had on the doing of science and on scientific paradigms of the world Thirdly where does humankind fit into the total picture with its uniquely moral nature In other words rather than privileging one discipline over another this study seeks to uncover a common ground for science ethics and literary creativity Throughout this inquiry certain nodal points emerge to bond the argument cogently together and create new meaning These anchor points are the notion of movement inherent in all forms of existence the changing concepts of evil in the altered spaces of reality and the creative impulse critical to the literary work of art as well as to the expanding universe This ambitious undertaking is unified through its use of phenomena typical of chaos and complexity theory as so many leitmotifs While they first emerged to explain natural phenomena at the quantum and cosmic levels chaos and complexity are equally apt for explaining moral and aesthetic events Hence the title Remapping Reality extends to the reconfigurations of the three main spheres of human interaction the physical the ethical and the aesthetic or creative

**Kant's Human Being** Robert B. Loudon, 2011-07-25 In Kant's Human Being Robert B Loudon continues and deepens avenues of research first initiated in his highly acclaimed book Kant's Impure Ethics Drawing on a wide variety of both published and unpublished works spanning all periods of Kant's extensive writing career Loudon here focuses on Kant's under appreciated empirical work on human nature with particular attention to the connections between this body of work and his much discussed ethical theory Kant repeatedly claimed that the question What is the human being is philosophy's most fundamental question one that encompasses all others Loudon analyzes and evaluates Kant's own answer to his question showing how it differs from other accounts of human nature This collection of twelve essays is divided into three parts In Part One Human Virtues Loudon explores the nature and role of virtue in Kant's ethical theory showing how the conception of human nature behind Kant's virtue theory results in a virtue ethics that is decidedly different from more familiar Aristotelian virtue ethics programs In Part Two Ethics and Anthropology he uncovers the dominant moral message in Kant's anthropological investigations drawing new connections between Kant's work on human nature and his ethics Finally in Part Three Extensions of Anthropology Loudon explores specific aspects of Kant's theory of human nature developed outside of his anthropology lectures in his works on religion geography education and aesthetics and shows how these writings substantially amplify his account of human beings Kant's Human Being offers a detailed and multifaceted investigation of the question that Kant held to be the most important of all and will be of interest not only to philosophers but also to all who are concerned with the study of human nature

**The Good Muslim** Mona Siddiqui, 2012-06-11 In this thought provoking book Mona Siddiqui reflects upon key themes in Islamic law and theology These themes which range through discussions about friendship divorce drunkenness love slavery and ritual slaughter offer fascinating insights into Islamic ethics and the way in which arguments developed in medieval juristic discourse Pre modern religious works contained a richness of thought hesitation and speculation on a wide range of topics which were socially relevant but also

presented intellectual challenges to the scholars for whom God's revelation could be understood in diverse ways. These subjects remain relevant today for practising Muslims and scholars of Islamic law and religious studies. Mona Siddiqui is an astute and articulate interpreter who relays complex ideas about the Islamic tradition with great clarity. Her book charts her own journey through the classical texts and reflects upon how the principles expounded there have guided her own thinking, teaching and research. *Rethinking Evil with Jacques Derrida* Nathan R. B. Loewen, 2009 **Heythrop Journal**, 2004 *SAIS Review*, 2005 *The Laws of Genocide* Thomas W. Simon, 2007-06-30 How should we confront hate? As political activists we could resort to fighting hate with hate. As concerned citizens we could consciously ignore or actively protest hate. As committed educators we could put the implements and survivors of hate on display. As committed scholars we could resuscitate the idea of evil. As humanitarian jurists we could put individual hate mongers on trial. Part I of this book makes a case for making the maximum use of reason to deal with hate. This means that we should actively debate those who promote hate. Further, as a close look at the history of applying law to incidents of hate and violence illustrates, the courtroom proves to be an excellent place to demonstrate the virtues of applying the tools of reason not to global evils but to the grave injustices of the world. In Part II Simon demonstrates the power of legal analysis in enhancing our understanding of genocide, probably the worst injustice imaginable. A close examination of each purported element of the crime of genocide redirects misguided turns taken by international jurists. Jacket *Encyclopedia of Genocide and Crimes Against Humanity* Dinah Shelton, 2005 Presents an alphabetically arranged encyclopedia with over three hundred fifty entries depicting genocide and war crimes from ancient history through the twenty-first century and includes information on the various individuals and groups that have been targeted, courts and tribunals, and various sorts of reparations. **Book Review Index**, 2004 Every 3rd issue is a quarterly cumulation. *Feminist Periodicals*, 2002 **AMERICAN ANTHOLOGIST**, 2002 **The British National Bibliography** Arthur James Wells, 2004 *Humboldt Journal of Social Relations*, 2006 *Judging Evil* Samuel H. Pillsbury, 2000-07-01 Why do killers deserve punishment? How should the law decide? These are the questions Samuel H. Pillsbury seeks to answer in this important new book on the theory and practice of criminal responsibility. In an argument both traditional and fresh Pillsbury holds that persons deserve punishment according to the evil they choose to do, regardless of their psychological capacities. Using real case examples he offers concrete proposals for legal reform, urging that modern preoccupations with subjective aspects of wrongdoing be replaced with rules that focus more on the individual's motives. *The SAIS Review of International Affairs*, 2005
