Probability Confirmation Simplicity:

Probability, Confirmation, and Simplicity Marguerite H. Foster, Michael Martin, 1983

Scientific Evidence Peter Achinstein, 2005-06 Peter Achinstein has gathered some prominent philosophers and historians of science for critical and lively discussions of both general questions about the meaning of evidence and specific ones about evidence for particular scientific theories

Logic, Language, and the Structure of Scientific Theories Wesley C. Salmon, Gereon Wolters, 1994-01-15 *Logic Language and the Structure of Scientific Theories* the second book in the Pittsburgh Konstanz Series marks the centennial of the births of Rudolf Carnap and Hans Reichenbach Original essays by internationally distinguished scholars range from epistemology and philosophy of language to logic semantics the philosophy of physics and mathematics In the realm of philosophy of physics it focuses upon such topics as space time and causality which play fundamental roles in relativity theory and quantum mechanics

Human Knowledge Eino Kaila, 2014-04-21 The Finnish philosopher Eino Kaila 1890-1958 wrote a classic statement of Logical Empiricism He had experienced the foundational debates of the Vienna Circle invited by Moritz Schlick during the early summer of 1929 Kaila was a keen follower of the further developments of the Circle His synoptic presentation and analysis of the basic themes or theses of the movement was based on his lectures as professor of theoretical philosophy at the University of Helsinki The work appeared as a book in Finnish in 1939 A Swedish translation by Georg Henrik von Wright followed immediately Earlier a translation of his philosophical essays from the original German entitled *Reality and Experience* edited by Robert S Cohen appeared in 1979 However this is the first translation of Kaila's major epistemological work Kaila's text remains a source for re-evaluations of Logical Empiricism

Philosophy and the Many Faces of Science Dionysios Anapolitanos, Aristeidēs Baltas, Stavroula Tsinorema, 1998 This collection of original papers by an international group of distinguished philosophers of science impressively demonstrates the links among the philosophic points of view areas of focus and methods of treatment used in examining the many facets of scientific inquiry It will be an indispensable collection for philosophers of science and scientists of various disciplines including physicists neuroscientists and psychologists

Philosophical Papers: Volume 1, Mathematics, Matter and Method Hilary Putnam, 1979-04-30 This volume deals with the philosophy of mathematics and of science and the nature of philosophical and scientific enquiry

The Structure of Scientific Inference Mary Hesse, 2023-11-10 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1974

Probability, Confirmation, and Simplicity Marguerite H. Foster, Michael L. Martin, 1969

Metaphysics and the Mind-body Problem Michael E. Levin, 1979 Defends the ancient thesis that man is a piece of matter that all his states are physical states and all his properties physical properties This is done in a metaphysical

framework which accommodates talk of the identity and diversity of such virtual entities as states and properties without being committed to their actual existence

Peirce's and Lewis's Theories of Induction Zhongying Cheng, 1969

Teorii i razvitii nauki, 1982 Opportunistic Constructive Induction Gregg H. Gunsch, 1991 *Evolutionary Theory*, 1982 **Foundations of Geometry & Induction** Jean Nicod, 1930 **The Review of Metaphysics**, 1966 **A London Bibliography of the Social Sciences**, 1931 Vols 1-4 include material to June 1 1929 **Rules of Acceptance and the Body of Scientific Knowledge** John Orson Gurney, 1974 **Philosophy of Science** Peter A. French, 1993 The 21 essays collected in this volume of Midwest Studies in Philosophy question and debate the primary assumptions of science. These are its conception of an orderly universe its ability to define and its ability to explain. The contributors approach these topics from varying perspectives including the historic development of our understanding of the scientific enterprise the controversy of opposing paradigms and the challenges raised by quantum mechanics

The Philosophy of Science David Papineau, 1996 The aim of this series is to bring together important recent writings in major areas of philosophical inquiry selected from a variety of sources mostly periodicals which may not be conveniently available to the university student or the general reader. The editor of each volume contributes an introductory essay on the items chosen and on the questions with which they deal. A selective bibliography is appended as a guide to further reading. The contributors ask whether we are justified in believing scientific theories and what attitude we should take to them if we are not. Although few philosophers seriously question the existence of everyday objects like trees and tables many have real doubts about viruses electrons and gravitational waves. The last two decades have seen important new work in the philosophy of science stimulated by sceptical attitudes towards scientific theories. Scientific realists have in turn countered with arguments of their own resulting in a wide ranging debate drawing from many different philosophical disciplines. The Philosophy of Science bridges the gap between both sides of the argument including articles on different species of realism and anti realism the underdetermination of theory by evidence the lessons of the history of science naturalized epistemology of science and Bayesian methodology
