

## Databases

When Access is opened, an initial screen appears, which gives you the option of creating a new **Blank Access database**, creating a new database using the **Access database wizards, pages, and projects**, or selecting an existing database by clicking **Open an existing file**.

### Creating a Blank Database

1. Select **Blank Access Database** from the **Startup** window, then click the **OK** button. If Access is already running, select **New** from the **FILE** menu, and then double-click on the **Database** icon in the **General** tab of the **New** window.
2. Select the directory to create the database in, name the file, and then click the **Save** button.
3. In the **Database** window that appears, click on the type of object you want to create in the **Object Bar** on the left. Then click the **New** button and select from the options listed to create a new data.

### Using the Database Wizards

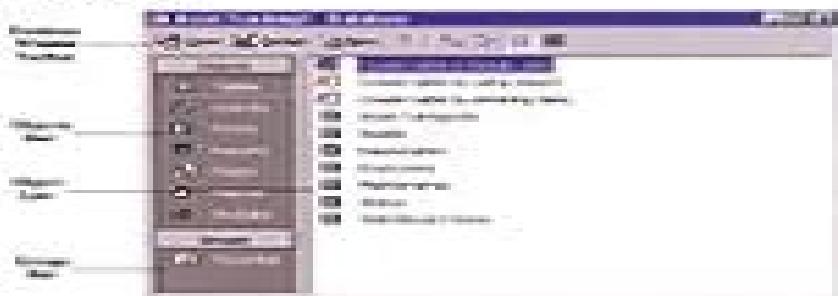

1. Select **Access database wizards, pages, and projects** from the **Startup** window and then click the **OK** button, or select **New** from the **FILE** menu if Access is already running.
2. Select the **Databases** tab in the **New** window to use a database wizard.
3. Select the type of database you want to create and click the **OK** button.
4. Select the directory to create the database in, name the file, and then click the **Save** button.
5. The next screen summarizes the database's features. Click the **Next** button to continue.
6. To choose what fields are included in the tables of the database, select a table in the **Tables in the database** list. Then check the fields you wish to include and uncheck the fields you wish to remove. The selected fields are optional fields (marked with **?**) and click the **Next** button to continue.
7. Continue through the wizard to set up **Forms** to enter data and **Reports** to analyze data.
8. Click the **Finish** button.

### Opening an Existing File

1. Select **Open an existing file** from the **Startup** window. If Access is already running, select **Open** from the **FILE** menu. Click the **OK** button.
2. Click the drive or folder that contains the database in the **Look in** box. If you can't click a shortcut (**History**, **My Documents**, **Desktop Favorites**, or **Web Folders**) in the **Places Bar**, double-click the folders in the folder list until you open the folder that contains the database.
3. Open the database by doing one of the following:
  - To open the database with shared access, click the **Open** button.
  - To open the database with exclusive access, click the **Open Exclusive** button and then select **Open Exclusive**.
  - To open the database for read-only access, click the **Open** button and then select **Open Read-Only**.
  - To open the database for read-only access and prevent other users from opening it, click the **Open** button and then select **Open Exclusive Read-Only**.

### Working in the Database Window

The **Database** window allows you to work with all the objects in the database. The types of database objects are shown in the **Object Bar** on the left side of the window. The list of all objects of that type will be listed in the **Objects List** on the right side of the window. The **Group Bar** allows you to create groups of different types of objects for easy access.

- Tables** are collections of data about a specific topic, such as customer products. They contain rows, referred to as records, and columns, referred to as fields.
- Queries** provide a way to view, change, and analyze data.
- Forms** provide a customized view for working with tables. You can make the database more interactive by adding text input boxes and command buttons.
- Reports** provide organized, professional views of data from queries or tables.
- Pages** create data access web pages.
- Macros** provide an automated way to perform common database actions, including opening, closing, saving, and using command buttons to print or save.
- Modules** use the Visual Basic programming language to perform advanced tasks that are beyond the scope of the reference guide.

### Working with Objects

1. Click on the type of object you wish to work with from the **Object Bar**.
2. Select the object you wish to work with from the **Objects List**.
3. From the **Database** window toolbar, select one of the following:
  - **Open** - brings the selected object in the **Database** or **Form** view.
  - **Design** - brings the selected object in the **Design** view.
  - **New** - to create a new database object.
