### Tip

UDDTs are stored in the database where they are created. However, if you want all your user databases to have a set of predefined, user-defined data types when they're created, create these UDDT in the model database. This is because every new database that is created in SQL Server is a copy of the model database.

Listing 2.19 creates a UDDT called `sen` in Model. This UDDT will be automatically transferred to every user database that is created afterward.

Listing 2.19 Creating UDDTs in Model

```
USE Model EXEC sp_addtype sen, 'CHAR(11)', 'NOT NULL'
GO
```

```
1 row(s) affected) Type added.
```

## Chapter 2. Elements of Transact-SQL

UDDTs can be created also in Enterprise Manager. To accomplish this, right-click User Defined Data Types (which is located inside the database folder) and then choose New User-Defined Data Type, which opens the window shown in Figure 2.1.

### Data Type Selection Criteria

You should be very careful when choosing data types. Always make sure that the data type you're choosing is the correct one and the length is appropriate, because it is very common to choose data types that are oversized. For example, let's say that you choose `VARCHAR(100)` as the data type and length for a ZIP code column. Although `VARCHAR(100)` is able to store this kind of data, you will waste a lot of space because ZIP codes have only five characters. In a small table, this isn't a problem, but in big tables this can lead to performance problems.

The same rule applies for integer data. Take a look at the maximum and minimum value of each integer data type when choosing among them. This way, you avoid using a big data type when you could have used a smaller one.

For example, a very efficient way to store IP addresses in a table is to use four `TINYINT` columns, because this data type can store integers from 0 to 255. If the length is not specified when declaring character (`CHAR`, `NCHAR`, `VARCHAR`, and `NVARCHAR`) or binary (`BINARY` and `VARBINARY`) data, SQL Server uses 1 as the length by default.
