Classroom disruptions. Preventive and reactive measures compared between theory and practice Matthias Gonszcz, 2022-01-18 Examination Thesis from the year 2012 in the subject Didactics Common Didactics Educational Objectives Methods grade 1 0 Sport Academy Cologne language English abstract A comprehensive work on the topic of classroom disruption specifically the preventive and reactive strategies discussed in the current literature presented in the theoretical section and examined in the practical section of the work for their effectiveness and use in the classroom Classroom management is given significant attention Objective of the work The situation described above raises the question of how theory and practice currently compare with regard to dealing with classroom disruptions What is the distribution of preventive and reactive measures in practice Which strategies do teachers

actually resort to and how do they evaluate their effectiveness This theoretical and empirical study aims to answer these and other related questions and to create a comparison between theory and practice Research questions I How many of the strategies discussed in the current literature are teachers aware of II Do teachers increase or decrease their repertoire of measures as they gain professional experience III Which of the strategies known to teachers from the current literature are actually used a What is the distribution of preventive and reactive measures in practice b What are the most common strategies IV How do teachers rate the effectiveness of the strategies used a What do teachers think of preventive measures b What are the reasons for possibly low use of preventive measures in school V How did they come up with these strategies VI What is the proportion of unconsciously used versus consciously used strategies Objectives To elaborate on the preventive and reactive measures discussed in the literature Highlight the importance of preventive measures versus reactive ones To determine whether the measures brought forth in the more current literature have been adopted in practice Identify which strategies are known and which are being used Identify which strategies are most commonly used in the school setting Determine the extent to which classroom disruptions are managed unconsciously To determine the teachers points of view regarding the different measures especially the preventive ones Comparison of theory and practice *International Journal of Educational Reform* ,2000 Prevention of Delinquent Behavior John D. Burchard,Sara N. Burchard,1987-06 Prevention of Delinquent Behavior brings together and critically examines current research on identification intervention and prevention of antisocial and delinquent behaviour in children The book focuses on the identification of high risk children and the design of intervention programmes An empirically based resource book it is designed for social scientists practitioners policy makers and advanced students interested in delinquency prevention Disruptive Student Behavior in the Classroom Kevin J. Swick,1980 Recent research suggests that student behavior is influenced by many factors and teacher responses to disorderly conduct must be based upon a careful assessment of each student s current situation as well as of the teacher s own role in the classroom This review of the literature discusses common factors affecting student behavior underlines the need for identifying behavior problems early and communicating with students and parents and suggests 15 positive responses to behavior problems that are suitable to different circumstances Five teacher behaviors that can influence student behaviors are discussed modeling good behavior designing suitable learning spaces interacting with students responding to student attempts to improve and assessing student learning for purposes of promoting development The possible impact of non classroom staff the curriculum and the community on both the development of and the solutions to behavior problems is also explored The document concludes with a listing of the 70 references concerning student behavior and discipline cited in the literature review and two dozen additional references on the topic Author PGD Teaching as Decision Making Marvin Pasch,1995 Teaching as Decision Making Successful Practices for the Elementary Teacher Second Edition provides comprehensive coverage of the major themes issues concepts and skill areas involved in planning

 Developing Self-discipline and Preventing and Correcting Misbehavior George G. Bear,2005 This text offers a balanced and comprehensive approach to show how a variety of research supported and practical strategies and techniques are used to prevent and correct misbehavior and to help achieve the long term aim of developing self discipline Rather than focusing on untested models of classroom discipline this book presents a more balanced and comprehensive approach to classroom discipline balancing the perspective of character educators and the perspective of those who are concerned about managing and correcting misbehavior Presents a balanced and comprehensive approach to class discipline The book highlights critical issues of classroom discipline that educators have faced over the years including the use of punishment the teaching of values character education the causes and implications of school violence and the rights of students with and without disabilities Pre service and in service teachers *Disruptive Behaviour* Louis Cohen,Alan Cohen,1987 This set of readings is intended for use with teachers on initial and in service courses Its purpose is to explore the concept of disruptive behaviour to review attempts to identify its nature and understand its origins and to show hard pressed teachers how to cope with disruption Section I Defining Disruptive Behaviour includes two readings concerned with problems of definition and operationalization Section II Understanding Disruptive Behaviour consists of ten readings which deal with studies of personal and family pathologies and with interactionist approaches to disruption These focus both upon pupils teachers schools and critical classroom incidents and upon the task of the school in wider social political and economic contexts Section III Coping with Disruptive Behaviour is composed of seven readings which illustrate three broad orientations to the problem of disruption behavioural cognitive and strategy of management techniques **Responsible Classroom Discipline** Vernon F.
