## **Preventing Heterosexism And Homophobia:**

*Preventing Heterosexism and Homophobia* Esther D. Rothblum, Lynne A. Bond, 1996 Even in today's society gay men, lesbians, and bisexuals experience multiple pressures and constraints related to their chosen lifestyles in addition to the stresses of everyday life. This dual tension can result in psychopathology among gay men, lesbians, and bisexuals. *Preventing Heterosexism and Homophobia* examines the gay and lesbian experience in light of this tension and points toward a future free of heterosexism. The stress of coming out, the uncertainty of parenting their children, and the difficulties facing ethnic minority lesbians and bisexuals cannot be adequately addressed without confronting the heterosexual bias in society. The contributors to this informative volume propose methods geared to the elimination of the heterosexual bias in various settings: health care, therapy, communities, corporate America, and education. Ultimately, this book examines both the risks and joys of being gay, lesbian, and bisexual and how to prevent heterosexism and its effects on the lives of all people, including those of heterosexuals.

**The Psychology of Sex, Gender, and Jobs** Louis Diamant, Jo Ann Lee, 2002 Employers often ascribe values to gender and sexual orientation that override truly relevant personal characteristics, including ability, intelligence, and dedication. Policy makers and business leaders need to be informed and involved in creating a workplace climate that openly accepts all people. This volume highlights concerns such as gender barriers to occupational advancement, sexual harassment, and female vulnerability, and heterosexual men as targets of sexual harassment. Diamant and Lee discuss the origins and development of sexual stereotypes that form the basis for discrimination. Business leaders must educate themselves and their employees to understand the wide range of differences that exist in the workforce. *The Psychology of Sex, Gender, and Jobs* offers solutions to managing the workforce of today.

**Introduction to the Counseling Profession** David Capuzzi, Douglas R. Gross, 2004 This book aims to give a self-contained presentation of a number of results which relate the volume of convex bodies in  $n$ -dimensional Euclidean space and the geometry of the corresponding finite-dimensional normed spaces. The methods employ classical ideas from the theory of convex sets, probability theory, approximation theory, and the local theory of Banach spaces. The book is in two parts. The first presents self-contained proofs of the quotient of the subspace theorem, the inverse Santaló inequality, and the inverse Brunn-Minkowski inequality. The second part gives a detailed exposition of the recently introduced classes of Banach spaces of weak cotype 2 or weak type 2 and the intersection of the classes weak Hilbert space. The book is based on courses given in Paris and in Texas.
