currently a doctoral student This volume is unique in its focus on coevolution and multilevel coevolutionary analysis as well as in its range of subject matter from empirical studies to leading edge epistemological discourses Each of the book's four main sections focuses on a major aspect of Campbell's legacy blind variation selection and retention multilevel coevolution process level analysis and modeling and epistemology and methodology In addition the volume includes a Foreword by Barbara Frankel Campbell and an unusual Appendix Donald Campbell's complete curriculum vitae Variations in Organization Science should be on the top of the reading list for any organization scientist interested in organizational evolution change and competitiveness This volume will also appeal to any scholar interested in the human and social capital base of firms and how organizational knowledge and learning work to provide the basis of competitive advantage
