Successful Service-Learning Programs Edward Zlotkowski,1998-03-15 Successful service learning programs offer college students valuable hands on learning experiences as they partner with their communities in cooperative service efforts

In this inspiring collection of essays written by prominent leaders of service learning programs each chapter provides concrete examples of how successful service learning programs can foster lifelong student commitments to community service and learning. By profiling ten successful service learning programs including those based at the University of Pennsylvania, Portland State University, Santa Clara University, and Bentley College, the contributors illustrate the power of service learning to enrich campuses and renew communities. The profiles collectively form a picture of the common and pressing issues affecting service learning programs across the United States. Each profile contains: A detailed history of the program's development; An overview of the basic internal operations of the program; A review of important community collaborations; An analysis of the defining dimension of the program's identity; Concluding insights on challenges faced by the program and remarks on its future.

Successful Service Learning Programs presents a compelling concept of what teaching and learning look like when colleges and universities commit to intellectual, social, and moral engagement. Through the authors' shared experiences, readers of this book will gain practical insight on ways in which to promote service learning on their campuses.

Caring and Community Jane S. Norbeck, Charlene Connolly, JoEllen Koerner, 2023-07-03 Although service learning and nursing would seem an obvious combination, nursing as a profession within academic research and health care organizations has only recently begun to embrace the true spirit of the practice. The chapters in this book, fourth in the *Service Learning in the Disciplines Series*, are rich with information, both theoretical and experiential, that describes ways in which nursing has begun to incorporate service learning as a methodology into many diverse settings and with communities of interest.

[Service-Learning in Higher Education](#) D. Butin, 2005-07-14 Advocates have positioned service learning as a real-world, real-time opportunity for students to encounter academic knowledge in a meaningful and relevant manner. Service learning in higher education settings offers a powerful alternative to traditional models of teaching and learning. Students are encouraged to develop links to local institutions, volunteer their time, and create a special bond between the university and the community in which they live. Service learning has become a very popular alternative to standard courses in higher education and is gaining significant popularity. This book takes a serious look at the unintended consequences and alternative conceptualizations of this mode of learning and explores what it could offer us in the future.

Service-learning Alan S. Waterman, 2014-03-18 Linking research and educational practice for the benefit of both is not a new idea. If practice such as service learning is a bold departure from the status quo, however, research is not just beneficial; it is critical. If schools are to

become laboratories of democracy and entrepreneurship and if students are to become engaged as partners in renewal of their communities a research case must be made for service learning Does learning take place Will other kinds of learning suffer What kinds of practice are most effective Clearly solid research is essential if this transforming way of teaching and learning is to be fully integrated into American schooling and youth development institutions The National Youth Leadership Council NYLC took a first step toward joining service learning practice with research in 1983 In 1991 NYLC created a center which initiated and encouraged program evaluation formative research that informs and improves practice and summative studies that measure results This volume grew out of a National Service Learning Conference an annual event convened by the NYLC A day long research seminar at the conference brought together researchers to discuss the latest developments among themselves and with practitioners Impressive in their range and rigor their papers offer documentation and analysis useful to an emerging research knowledge base It is a starting point for the evidence needed to firmly establish service learning for K 12 age people as a widely accepted way of teaching and learning
