

Sampling Inspection

- When sampling inspection is used, the number of parts in the sample is usually small compared to the quantity of parts produced
 - Sample size may be 1% of production run
- Because not all of the items in the population are measured, there is a risk in any sampling procedure that defective parts will slip through
 - The risk can be reduced by taking a larger sample size
 - Fact is that less than 100% good quality must be tolerated as the price of using sampling
