Bochenski,2012-12-06 Professor Bochenski as he himself points out in the prologue is a logician he is best known in England and the United States for his work in the history of logic and more recently in Soviet and East European philosophy But he has taught philosophy for many years in Rome in Switzerland and on a number of visits to the United States and in this book provides an elementary introduction to contemporary work in the field As a means to this end he has chosen to deal with four alternative methods employed by philosophers in the twentieth century Philosophical methodology has not attracted much attention in English speaking circles as a distinct branch of the discipline of philosophy the term methodologist if used at all would ordinarily be taken to refer to somebody concerned with scientific rather than philosophical method When therefore Professor Bochenski refers as he frequently does to contemporary methodologists meaning people who debate the respective merits of phenomenology and mathematical logic as ways of approaching the world the phrase has an odd ring But philosophical methodology really makes a great deal more sense than scientific methodology In science methodology is almost superfluous given all the available information and a reasonably clear idea of what is wanted there is usually not much ambiguity as to the means of getting it or not much that could be resolved by mere argument **The Methods of Contemporary Thought by J.M.
