Mexican Architectures:

The Making of Mexican Modernist Architecture Celia Esther Arredondo Zambrano, 2023-05-03 This book presents the making of Mexican Modernist architecture through five power structures academic social status economic political gender and postcolonial and by interviews and analysis of 13 key Mexican architects These include Luis Barrag n Jos Villagr n Garc a Juan O Gorman Pedro Ram rez V zquez Agust n Hern ndez Abraham Zabludovsky Carlos Mijares Ricardo Legorreta Juan Jos D az Infante Enrique Norton Alberto Kalach Javier Sordo Madaleno and Clara de Buen Although the five power structures framed what was built the testimony of these Mexican architects helps us to recognize and discover subtleties and nuances Their views thereby shed light on what contributed to making Mexican Modernist architecture so distinctive globally Even if these architects were not always aware of the power structures their projects nonetheless supported discrimination marginalization and subjugation In that sense the book also reveals the extent to which these power structures are still present today The Making of Mexican Modernist Architecture s uniqueness lies in uncovering the remarkable buildings that arose amid the five power structures while at the same time questioning their validity It also voices the urgent need today for a new kind of architecture outside these boundaries The book is essential reading for anyone studying Mexican and Latin American architecture

Modern Architecture in Mexico City Kathryn E. O'Rourke, 2017-02-10 Mexico City became one of the centers of architectural modernism in the Americas in the first half of the twentieth century Invigorated by insights drawn from the first published histories of Mexican colonial architecture which suggested that Mexico possessed a distinctive architecture and culture beginning in the 1920s a new generation of architects created profoundly visual modern buildings intended to convey Mexico s unique cultural character By midcentury these architects and their students had rewritten the country s architectural history and transformed the capital into a metropolis where new buildings that evoked pre conquest colonial

and International Style architecture coexisted Through an exploration of schools a university campus a government ministry a workers park and houses for Diego Rivera and Luis Barragan Kathryn O Rourke offers a new interpretation of modern architecture in the Mexican capital showing close links between design evolving understandings of national architectural history folk art and social reform This book demonstrates why creating a distinctively Mexican architecture captivated architects whose work was formally dissimilar and how that concern became central to the profession

Spectacular Mexico Luis M. Castañeda, 2014-11-01 In the wake of its early twentieth century civil wars Mexico strove to present itself to the world as unified and prosperous The preparation in Mexico City for the 1968 Summer Olympics was arguably the most ambitious of a sequence of design projects that aimed to signal Mexico's arrival in the developed world In *Spectacular Mexico* Luis M Castañeda demonstrates how these projects were used to create a spectacle of social harmony and ultimately to guide the nation's capital into becoming the powerful megacity we know today Not only the first Latin American country to host the Olympics but also the first Spanish speaking country Mexico's architectural transformation was put on international display From traveling exhibitions of indigenous archaeological artifacts to the construction of the Mexico City subway *Spectacular Mexico* details how these key projects placed the nation on the stage of global capitalism and revamped its status as a modernized country Surveying works of major architects such as Félix Candela Pedro Ramirez Vazquez Ricardo Legorreta and graphic designer Lance Wyman Castañeda illustrates the use of architecture and design as instruments of propaganda and nation branding Forming a kind of image economy Mexico's architectural projects and artifacts were at the heart of the nation's

economic growth and cultivated a new mass audience at an international level Through an examination of one of the most important cosmopolitan moments in Mexico s history Spectacular Mexico positions architecture as central to the negotiation of social economic and political relations

Spanish Colonial Art and Architecture of Mexico and the United States Southwest M. Grizzard,1986-09-05 **Latin America** Mauricio Tenorio-Trillo,2020-02-06 Latin America is a concept firmly entrenched in its philosophical moral and historical meanings And yet Mauricio Tenorio Trillo argues in this landmark book it is an obsolescent racial cultural idea that ought to have vanished long ago with the banishment of racial theory Latin America The Allure and Power of an Idea makes this case persuasively Tenorio Trillo builds the book on three interlocking steps first an intellectual history of the concept of Latin America in its natural historical habitat mid nineteenth century redefinitions of empire and the cultural political and economic intellectualism second a serious and uncompromising critique of the current Latin Americanism which circulates in United States based humanities and social sciences and third accepting that we might actually be stuck with Latin America Tenorio Trillo charts a path forward for the writing and teaching of Latin American history Accessible and forceful rich in historical research and specificity the book offers a distinctive conceptual history of Latin America and its many connections and intersections of political and intellectual significance Tenorio Trillo s book is a masterpiece of interdisciplinary scholarship *Mexican Architectures* Guillermo Pérez M.,Guillermo Perez,2000 [Mexican Archaeology](#) Thomas Athol Joyce,1914 *Architectural Record* ,1926

Architecture ,1929 The professional architectural monthly varies **American Architect and the Architectural Review** ,1892 *Architect Knows Best* Simon Richards,2016-04-15 The idea that buildings could be used to reform human behaviour and improve society was fundamental to the modernist architecture and planning of people like Walter Gropius Le Corbusier and Jos Luis Sert in the first half of the 20th century Their proposals for functional zoning multi level transport

high rise living and machine inspired aesthetics came under attack from the 1950s onwards and many alternative approaches to architecture and planning emerged It was thought that the environmental determinist strand of the discourse was killed off at this time as well This book argues that it was not but on the contrary that it has deepened and diversified Many of the most prominent architect planners continue to design with a view to improving the behaviour of individual people and of society at large By looking at and interviewing major figures and movements of recent years in Britain Europe and America including Louis Kahn Peter Eisenman Andrés Duany Jane Jacobs Robert Venturi and Denise Scott Brown it demonstrates the myriad ways that architect planners seek to shape human behaviour through buildings In doing so the book raises awareness of this strand within the discourse and examines its different purposes and manifestations It questions whether it is an ineradicable and beneficial part of architecture and planning or a regrettable throwback to a more authoritarian phase discusses why it is seldom acknowledged directly and whether it could be handled more responsibly and with greater understanding Richards does not provide any simple solutions but in conclusion is critical of architect planners who abuse the rhetoric of social reform simply to leverage their attempts to secure building commissions while being more sympathetic towards those who appear to have a sincere desire to improve society through their buildings
