

Treatment Strategies in Hypertension

1.13 billion
people worldwide
have hypertension

1 in 4 men
and 1 in 5 women
had hypertension in 2015

<1 in 5 people
with hypertension have the
problem under control

The Present:
significant gaps in
diagnosis and treatment

In the last few years there has been an impressive paucity
of innovative studies

Research focused on BP mechanisms and novel
antihypertensive drugs is dramatically slowing

The Future:

Digital/health technology is expected to be increasingly used

Several areas should be better outlined with regard to BP
diagnosis and treatment targets

The existing antihypertensive drugs should be better used by
exploiting available and novel free and fixed combinations

Renal artery denervation is another procedure which proved
effective in the management of hypertension

Methods Hypertension

**George Frederick Shrady, Thomas
Lathrop Stedman**
