the content is drawn upon ideas and insights gained from extensive reading of literature pertaining to social studies However  
the bulk of the content in this book is based on and informed by my combined personal and professional lived experiences as  
a student in elementary social studies methods classroom as a developer of social studies methods curriculum as faculty and  
supervisor of pre service teachers of social studies in K 12 classrooms for several semesters within a teacher education and  
professional development program at Central Michigan University The book uses a unique pedagogic approach to social  
studies methods instruction in Teacher education programs at higher education level The approach is not only to help  
practitioners gain a deeper understanding but also to be able to articulate their understanding of the nature and scope the

this popular text offers practical interesting exciting ways to teach social studies and a multitude of instructional and  
professional resources for teachers Theory curriculum methods and assessment are woven into a comprehensive model for  
setting objectives planning lessons units and courses choosing classroom strategies and constructing tests for some of the

field's most popular and enduring programs. The reflective and integrative framework emphasizes building imagination, insight, and critical thinking into everyday classrooms; encourages problem-solving attitudes and behavior; and provokes analysis, reflection, and debate. The text includes separate chapters on teaching each of the major areas of the social studies curriculum. Throughout the text, all aspects of curriculum and instruction are viewed from a tripartite perspective that divides social studies instruction into didactic, factual, reflective, analytical, and affective/judgmental components. These three components are seen as supporting one another, building the groundwork for taking stands on issues past and present. At the center is the author's belief that the heart and soul of social studies instruction, perhaps all teaching, lies in stimulating the production of ideas, looking at knowledge from others' viewpoints, and formulating for oneself a set of goals, values, and beliefs that can be explained and justified in open discussion.
