**Materialism, Minds, and Cartesian Dualism** Robert Francis Almeder, 2022-03-11 Materialism Minds and Cartesian Dualism offers a history of how philosophers and scientists have thought about mind body problems especially as it concerns the question of consciousness after death This book interrogates the last thirty years of scientific research on reincarnation considering a series of case studies impossible to explain in any other way than persisting consciousness after death Although this book does not attempt to argue why or how some people reincarnate and how long they reincarnate It argues that these case studies demonstrate in compelling ways that some people have indeed to some degree reincarnated Therefore the philosophical materialist position that only physical objects exist is refuted *The Restructuring of Social and Political Theory* Richard J. Bernstein, 1978-03 In this volume Bernstein foresees and outlines the development of a social theory that is at once empirical interpretive and critical

**Historical Judgement** Jonathan Gorman, 2014-11-27 The historical profession is not noted for examining its own methodologies Indeed most historians are averse to historical theory In *Historical Judgement* Jonathan Gorman's response to this state of affairs is to argue that if we want to characterize a discipline we need to look to persons who successfully occupy the role of being practitioners of that discipline So to model historiography we must do so from the views of historians Gorman begins by showing what it is to model a discipline by using recent philosophy of law and philosophy of science There are different models at work whose rivalry and resolution are to be historically understood With this approach in place he is able to develop the history of historiography and explore the character of historiography as presented by historians He reveals that historians conform to various norms that historians now and in the past have agreed and disagreed about the same set of interrelated matters truth telling moral judgement and the synthesis of facts and it is this internal understanding that we need to recover if we are to arrive at a correct characterization of the discipline of historiography Demonstrating how the practice of historiography requires choices and therefore the exercise of judgement Gorman is able to show that in their making of judgements historians enjoy the immense benefit of hindsight He shows how in reflecting on their own discipline historians have typically failed to attend adequately to the history of historiography neglecting to situate previous historians within their historical contexts or to pay adequate attention to the fact that present historians too are within a context that will change In addition Gorman's approach which emphasizes the power and necessity of choice and which rests on the pragmatic holistic empiricism of Quine shows postmodernism not to be the threat that some historians feel it to be indeed it is shown to be a radical form of empiricism Gorman shows how the historical enterprise may be established in our factual and moral understanding in the light of our choices and commitments to a shared world *Historical Judgement* is an original and important contribution to the philosophy of history By bringing together the ideas of historians and philosophers Gorman presents a much more practitioner focused examination of the discipline of history one that will hopefully encourage historians to think more about the nature of what
