## **Ourselves As Students:**

**Ourselves as Students** ,1996 These essays by Old Dominion University students deal with two questions What impact do their own race class gender and ethnic identities have upon them as students How do their culture and the university culture interact to affect their ability to learn The focus of these essays is on the overlap between the students identities as students and their identities based on gender race class and ethnic origin The project began as an assignment in a women s studies class at Old Dominion University in 1993 when students in a mixed graduate and undergraduate course were asked to write a brief analysis of themselves as students accounting for the impact of gender race and social class on what they studied what they heard in class how they were treated in the classroom how they treated others there and what their level of comfort in the university was Invited to add other variables such as religion nationality age sexual orientation or disability if they considered these significant to their identities as students the students were urged to consider not only the disadvantages these various identities gave them but also the privileges and advantages The resulting essays stimulated great interest in what students had to say and led to the formation of The Broad Minds Collective made up of four students from the class as well as its instructor which set about the task of soliciting and collecting additional essays Although most essays contain overlapping themes the editors detected four motifs that encompass virtually every essay included in the book In the section Cultural Perceptions and Assumptions students show their awareness of how culturally defined categories affect education Essays in Belonging and Alienation in the Classroom discuss the students level of comfort in the classroom and the degree to which they feel they belong at the university The essays in Making Sense of Our Lives Through Education reveal the students use of education to learn more about the forces that shape them In Search of an Education highlights students efforts to wrest what they feel they need from a college education Rather than presenting a multicultural educational theory or conducting a sterile sociological study The Broad Minds Collective has allowed students to speak for themselves Abstraction is replaced by stories of personal conflict struggle and victory The Hindusthanee Student ,1917

Reasonable Children Michael S. Pritchard, 1996 The public outcry for a return to moral education in our schools has raised more dust than it has dispelled Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education
