Measure and Integration Heinz König, 2012-06-06. This collection of Heinz König's publications connects to his book of 1997 *Measure and Integration* and presents significant developments in the subject from then up to the present day. The result is a consistent new version of measure theory including selected applications. The basic step is the introduction of the inner and outer measures and their extension to unique maximal measures. New envelopes for the initial set function to replace the traditional Carathéodory outer measures have been created which lead to much simpler and more explicit treatment. In view of these new concepts, the main results are unmatched in scope and plainness as well as in explicitness. Important examples are the formation of products, a unified Daniell-Stone-Riesz representation theorem, and projective limits. Further to the contributions in this volume, after 2011 Heinz König published two more articles that round up his work: *On the marginals of probability contents on lattices* *Mathematika* 58 No 2 319-323 2012 and *Measure and integration: the basic extension and representation theorems in terms of new inner and outer envelopes* *Indag. Math. New Ser.* 25 No 2 305-314 2014.
