Math On Call Teachers Resource:

Math on Call Virginia H. Sullaway, Nancy E. Wilson, 1999 A self help resource companion to any math program

Research on Mathematics Textbooks and Teachers' Resources Lianghuo Fan, Luc Trouche, Chunxia Qi, Sebastian Rezat, Jana Visnovska, 2018-02-13 This book focuses on issues related to mathematics teaching and learning resources including mathematics textbooks teacher guides student learning and assessment materials and online resources The book highlights various theoretical and methodological approaches used to study teaching and learning resources and addresses the areas of resources teachers and students at an international level As for the resources the book examines the role textbooks and other curricular or learning resources play in mathematics teaching learning and assessment It asks questions such as Could we consider different types of textbooks and roles they play in teaching and learning How does the digitalization of information and communication affect these roles What are defining features of e textbooks and how could we characterize the differences between the traditional textbooks and e textbooks As for the teachers the book discusses the relationships between teachers individual and collective resources and the way in which we could model such relationships Specific questions addressed are What is the role of teachers in developing textbooks and other teaching and learning materials What are the relationships between resource designers and users What are the consequences of these changing roles and relationships for the teaching of mathematics and for teacher knowledge and professional development As for the students the book explores how students as well as their teachers interact through resources It raises and addresses questions such as What are the effects of modern ICT particularly internet on students use and the design of resources How do changing patterns of use and design affect student behaviour learning and relationships to the subject of mathematics

The 'Resource' Approach to Mathematics Education Luc Trouche, Ghislaine Gueudet, Birgit Pepin, 2019-11-29 This edited volume will help educators better analyze methodological and practical tools designed to aid classroom instruction It features papers that explore the need to create a system in order to fully meet the uncertainties and developments of modern educational phenomena These have emerged due to the abundance of digital resources and new forms of collective work The collected papers offer new perspectives to a rising field of research known as the Documentational Approach to Didactics This framework was first created by the editors of this book It seeks to develop a deeper understanding of mathematics teaching expertise Readers will gain insight into how to meet the theoretical questions brought about by digitalization These include how to analyze teachers work when they prepare for their teaching how to conceptualize the relationships between individual and collective work and how to follow the related processes over the long term The contributors also provide a comparative view in terms of contrasting selected phenomena across different educational cultures and education systems For instance they consider how differences in curriculum resources are available to teachers and how teachers make use of them to shape instruction Coverage also considers the extent to which teachers make use of additional material particularly

those available through the global marketplace on the Internet This book builds on works from the Resources 2018 Conference Understanding teachers work through their interactions with resources for teaching held in Lyon France
