Material Objects:

Ontology, Identity, and Modality Peter van Inwagen, 2001-03-22 This book gathers together thirteen of Peter van Inwagen's essays on metaphysics several of which have acquired the status of modern classics in their field They range widely across such topics as Quine's philosophy of quantification the ontology of fiction the part whole relation the theory of temporal parts and human knowledge of modal truths In addition van Inwagen considers the question as to whether the psychological continuity theory of personal identity is compatible with materialism and defends the thesis that possible states of affairs are abstract objects in opposition to David Lewis's extreme modal realism A specially written introduction completes the collection which will be an invaluable resource for anyone interested in metaphysics *Phases of Objects* Justin Mooney, 2026-02-03 In *Phases of Objects* Justin Mooney argues that all objects should be treated like children just as a child can cease to be a child without ceasing to exist when it grows into an adult so can a clay statue cease to be a statue without ceasing to exist when it is squashed into an amorphous lump a car can cease to be a car without ceasing to exist when it is crushed into a block of scrap metal and a person can cease to be a person without ceasing to exist when a person dies and becomes a corpse This view is called phasalism because it entails that these changes are changes in respect of properties called phase sortals which are sort or kind properties that an object can instantiate temporarily Mooney defends phasalism against the prevailing consensus in metaphysics by spelling out a phasalist metaphysics of material objects in great detail highlighting its virtues and defending it against objections In the course of this defense Mooney proposes a novel criterion of identity for material objects a novel approach to solving coincidence puzzles about material objects and a novel account of sameness relations The final chapter draws out and defends some of the controversial consequences of phasalist metaphysics in the area of personal identity and personal ontology focusing particularly on three important questions about human people when does a human person begin to exist When does a human person cease to exist And what happens to a human person in brain transplant cases **The Double Lives of Objects** Thomas Sattig, 2015 Thomas Sattig develops a novel philosophical picture of ordinary objects such as persons tables and trees He carves a middle way between classical mereology and Aristotelian hylomorphism and argues that objects lead double lives They are compounds of matter and form and each object's matter and form have different qualitative profiles **Central Works of Philosophy: The twentieth century: Moore to Popper** John Shand, 2005 Recreates in detail the life of this advisor to the Plantagnets and knight extraordinaire From the Trade Paperback edition **Sensory Individuals** Aleksandra Mroczko-Wąsowicz, Rick Grush, 2023-07-06 *Sensory Individuals Unimodal and Multimodal Perspectives* provides an interdisciplinary well balanced and comprehensive look at different aspects of unisensory and multisensory objects using both nuanced philosophical analysis and informed empirical work The research presented in this book represents the field's progression from treating neural sensory processes as primarily modality specific towards its current state of the art according to which perception and

its supporting neural processes are multi modal modality independent meta modal and task dependent Even within such approaches sensory stimuli properties brain activations and corresponding perceptual phenomenology can still be characterized in a modality specific way The book examines the basic building blocks of human perception and whether they are best understood as sensory modality dependent units of different forms or multimodal perceptual objects The book combines a variety of innovative and integrative angles to explore the topic and acts as a catalyst for an increasingly diverse field of research which is in an exciting phase of growth and advancement New questions are arising as quickly as they are being answered and the collection *Sensory Individuals* provides an original and up to date addition to the field
