Interactive Systems for Experimental Applied Mathematics Melvin Klerer,2012-12-02 Interactive Systems for

Experimental Applied Mathematics is a collection of papers presented at the 1967 Association for Computing Machinery

ACM Inc Symposium on Interactive Systems for Experimental Mathematics held in Washington D C in conjunction with the

ACM National Meeting This book is organized into five parts encompassing 46 chapters The opening part deals with the

general criteria for interactive on line systems that seem most important for the experimental solution of mathematical

problems This part specifically describes the AMTRAN REDUCE EASL POSE VENUS and CHARYBDIS computer systems and

languages The next two parts cover the components of interactive systems including coherent programming interactive

console mathematical symbol processing message system and computer aided instruction The fourth part examines a scheme

for permitting a user of conventional procedural programming languages namely FORTRAN to test actual error propagation

in numerical calculations This part also describes the features of Analyst Assistance Program an on line graphically oriented

conversational computing system designed to perform small nonrecurring numerical computations The concluding part presents several implications of selected computer systems the resulting problems and their proposed solutions This book is of great benefit to computer scientists and engineers mathematicians and undergraduate and graduate students in applied mathematics *Prentice Hall Interactive Math for Introductory Algebra Student Package* K.
