Duarte, Nicolau Brandão, 2023-11-17 This book contains a set of essays on the teaching of Architecture and Urbanism written by university professors and researchers from several countries It argues that the teaching of architecture and urbanism is in a state of crisis architecture seems unable to respond to current problems and urbanism seems incapable of fulfilling the needs of a more balanced society and its built environment including the human right to housing The book comprises historical analyses systematization of concepts manifestos and social evaluations and above all an alignment of new objectives curricular plans and pedagogical methodologies The Figure of Knowledge Sebastiaan Loosen, Rajesh Heynickx, Hilde Heynen, 2020-10-01 It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed such as critical theory critical regionalism deconstructivism and pragmatism Yet the intellectual contours of what constitutes architectural theory have been constantly in flux It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the resulting figure of knowledge sets the conditions for the actual arguments made The contributions in this volume focus on institutional geographical rhetorical and other conditioning factors They thus screen the unspoken rules of engagement that postwar architectural theory ascribed to Urban Landscape Perspectives Giovanni Maciocco, 2008-02-01 *Urban Landscape Perspectives* explores how landscape terminology can be usefully brought into the urban debate The articles are by scholars who have a particular interest in and experience of the city project at various operative scales They include theoretical reflections on the landscape as an eminently project like figure The book describes new methods and approaches dealing with the contemporary environment whether it is from the point of view of the city or the landscape **Architectural Theories of the Environment** Ariane Lourie Harrison, 2013-03-05 As architects and designers we struggle to reconcile ever increasing environmental humanitarian and technological demands placed on our projects Our new geological era the Anthropocene marks humans as the largest environmental force on the planet and suggests that conventional anthropocentric approaches to design must accommodate a more complex understanding of the interrelationship between architecture and environment Here for the first time editor Ariane Lourie Harrison collects the essays of architects theorists and sustainable designers that together provide a framework for a posthuman understanding of the design environment An introductory essay defines the key terms concepts and precedents for a posthuman approach to architecture and nine fully illustrated case studies of buildings from around the globe demonstrate how issues raised in

posthuman theory provide rich terrain for contemporary architecture making theory concrete By assembling a range of voices across different fields from urban geography to critical theory to design practitioners this anthology offers a resource for design professionals educators and students seeking to grapple the ecological mandate of our current period Case studies include work by Arakawa and Gins Arons en Gelauff Casagrande The Living Minifie van Schaik R Sie n SCAPE Studio Gang and xDesign Essayists include Gilles Cl ment Matthew Gandy Francesco Gonz les de Canales Elizabeth Grosz Simon Guy Seth Harrison N Katherine Hayles Ursula Heise Catherine Ingraham Bruno Latour William J Mitchell Matteo Pasquinelli Erik Swyngedouw Sarah Whatmore Jennifer Wolch Cary Wolfe and Albena Yaneva Architecture ,1996-07 **Catalònia Culture** ,1996 World Architecture ,1996 □□□□ ,2006 **Architectural Publications Index** ,2000 Designing Suburban Futures June Williamson,2013-05-07 Suburbs deserve a better more resilient future June Williamson shows that suburbs aren t destined to remain filled with strip malls and excess parking lots they can be reinvigorated through inventive design Drawing on award winning design ideas for revitalizing Long Island she offers valuable models not only for U S suburbs but also those emerging elsewhere with global urbanization Williamson argues that suburbia has historically been a site of great experimentation and is currently primed for exciting changes Today dead malls aging office parks and blighted apartment complexes are being retrofitted into walkable sustainable communities Williamson shows how to expand this trend highlighting promising design strategies and tactics She provides a broad vision of suburban reform based on the best schemes submitted in Long Island s highly successful Build a Better Burb competition Many of the design ideas and plans operate at a regional scale tackling systems such as transit aquifer protection and power generation While some seek to fundamentally transform development patterns others work with existing infrastructure to create mixed use shared networks Designing Suburban Futures offers concrete but visionary strategies to take the sprawl out of suburbia creating a vibrant new suburban form It will be especially useful for urban designers architects landscape architects land use planners local policymakers and NGOs citizen activists students of urban design planning architecture and landscape architecture *The Architects' Journal* ,1997 Future Survey Annual 1992 Michael Marien,1993-01-30 Thresholds ,1997 **European Spatial Research and Policy** ,2001 *The Canadian Architect* ,1996 **Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl** Avery Library,1996 Architectural Record ,2001
