

# Reading Approaches

## Whole Language and Phonics

## Whole Language

The **whole language** approach to reading teaches the recognition of whole words and phrases within meaningful contexts.

The approach focuses on:

- meaning when thinking about writing
- children making sense of the skills used in reading and writing
- children making connections between reading and real life
- meaningful words
- sight word recognition both in and out of context to build fluency

## Phonics

The **phonics** approach to reading teaches the association of sounds and symbols in an alphabetic writing system.

There are different approaches to phonics:

- Synthetic Phonics
- Analytical Phonics
- Analogy Phonics
- Embedded Phonics

## Analytical Phonics

**Analytical phonics** is also known as **explicit phonics**.

Students are taught to identify common phonemes in a set of words. For example, given the words 'path', 'pat', 'pig', 'pet', they identify the common phoneme as /p/.

This method of learning to read moves from the whole to the smallest parts.

## Analogy Phonics

**Analogy phonics** is a type of **analytical phonics**.

Students are taught to use parts of words they know to decode new words.

Words that share common **parts** can be decoded by applying the knowledge of the first to new words. These words are sometimes called **word families**.

If a student knows the word 'lake' and they can identify the 'ake' part of the word they can use this knowledge to work out words such as 'take', 'bake', 'make' and so forth.

## Embedded Phonics

**Embedded phonics** teaches phonics skills within the context of 'real' reading.

The skills are taught as they arise rather than systematically.
