Reactive Internet Programming Franck Barbier,2016-04-01 Is Internet software so different from ordinary software This book practically answers this question through the presentation of a software design method based on the State Chart XML W3C standard along with Java Web enterprise Internet of Things and Android applications in particular are seamlessly specified and implemented from executable models Internet software puts forward the idea of event driven or reactive programming as pointed out in Bon r et al s Reactive Manifesto <http://www.reactivemanifesto.org> It tells us that reactivity is a must However beyond concepts software engineers require effective means with which to put reactive programming into practice This book s purpose is to outline and explain such means The lack of professional examples in the literature that illustrate how reactive software should be shaped can be quite frustrating Therefore this book helps to fill in that gap by providing in depth professional case studies that contain comprehensive details and meaningful alternatives Furthermore these case studies can be downloaded for further investigation Internet software requires higher adaptation at run time in particular After reading Reactive Internet Programming the reader therefore will be ready to enter the forthcoming Internet era

[Mobile Agents for Telecommunication Applications](#) Ahmed Karmouch,Thomas Magedanz,Jaime Delgado,2003-06-30 Research in the telecommunications eld suggests that future network infrastructures will be composed of sensors wireless devices personal digital assistants networked appliances and numerous types of services This brings up key issues such as unfamiliar users and service interfaces discovering services that match user s needs nding and tracking people and resources establishing useful contacts and appropriate associations between resources and users and managing a large number of dynamic network entities all of which must be performed in an automated and proactive manner with a certain degree of autonomy and mobility These are the main characteristics exhibited by mobile software agent behavior making the technology more suitable for future telecommu cation applications and services It also reveals the tremendous potential for the mobile agent paradigm The potential complexity of mobile agent operation requires that mechanisms exist on several levels to coordinate its activities For this purpose research and development on various forms of mobile agents continues to grow in a staggering fashion Age based applications and services such as network management e commerce information gathering on the Internet mobile communications active networking and most recently ad hoc communications are becoming increasingly popular and continue to contribute to the development and to the success of mobile agent technology In addition it is well established that mobile agents is an ideal sister technology for mobile ad hoc networks where users applications services devices and networks are mobile and dynamically con gurable
