

# THE BITCOIN MINING SAGA - PART I

By Patrícia Estevão

## What is Bitcoin Mining?

It's a decentralized computational process that serves 2 purposes:

1.

Confirms transactions in a trustful manner when enough computational power (effort) is devoted to a block

2.

Creates (issues) new bitcoins in each block

IT GOES LIKE THIS:

Select the header of the most recent block and insert it into the new block as a hash

Verify if transactions are valid

Solve the Proof of Work problem

Bundle transactions in a block

When the solution is found, the new block is added to the local blockchain and propagated to the network
